Principles of Heat Transfer Massoud Kaviany, 2002 CD ROM contains Equations and relations models for thermal circuit modeling

Characterizing Expert and Novice Differences in Problem Solving in Heat Transfer Sarah Elizabeth Parikh, 2011 This research investigates adaptive expertise through the analysis of written open ended questions The open ended questions were given to experts advanced graduate students and to novices undergraduates taking an introductory heat transfer course Analysis of the experts responses to these questions indicated that experts make qualifying statements in their responses a newly identified characteristic of expertise Analysis of the novices responses indicates areas for future work in research and teaching Additionally the wording of the open ended questions appears to be important the responses to questions that asked participants to choose an outcome showed greater differences between the expert and novice participants than questions that asked participants to explain how or why something happens

Journal of Thermophysics and Heat Transfer, 2006 This journal is devoted to the advancement of the science and technology of thermophysics and heat transfer through the dissemination of original research papers disclosing new technical knowledge and exploratory developments and applications based on new knowledge It publishes papers that deal with the properties and mechanisms involved in thermal energy transfer and storage in gases liquids and solids or combinations thereof These studies include conductive convective and radiative modes alone or in combination and the effects of the environment
