## Chapter 8 Rotational Motion Banked Airplanes

An airplane banks as it turns along a horizontal circular path in the air. Except for the thrust of its engines and air resistance, the two significant forces on the plane are gravitational  $mg$  (vertical), and lift  $L$  (perpendicular to the wings).

### Vector Component Analysis:

With a ruler and a pencil, resolve vector  $L$  into two perpendicular components, horizontal  $L_x$  and vertical  $L_y$ . Make these vectors dashed to distinguish them from  $L$ .

Circle the correct answers.

1. The velocity of the airplane at any instant is  
[along the radius of] [tangent to] its circular path.
2. If  $L$  were somehow replaced with  $L_x$  and  $L_y$ ,  
the airplane [would] [would not] behave the  
same as being supported by  $L$ .
3. Since the airplane doesn't accelerate vertically, component  $L_y$  must be  
[greater than] [less than] [equal and opposite to]  $mg$ .
4. Since the plane continues in circular motion, component  $L_x$  must equal [zero] [ $m^2/r$ ]  
and be a [centripetal] [centrifugal] [nonexistent] force. Furthermore,  $L_x$  is  
[along the radius of] [tangent to] the circular path.

### Vector Resultant Analysis:

5. Rather than resolving  $L$  into horizontal and  
vertical components, use your pencil to  
sketch the resultant of  $mg$  and  $L$  using the  
parallelogram rule.
6. The resultant lies in a [horizontal] [vertical]  
direction and [toward] [away from] the center  
of the circular path. The resultant of  $mg$  and  $L$  is a  
[centripetal] [centrifugal] force.
7. The resultant of  $mg$  and  $L$  is the same as [ $L_x$ ] [ $L_y$ ].

**Challenge:** Explain in your own words why the resultant of two vectors can be the same as a single component of one of them.

Sunal,Cynthia S Sunal,2016-12-01 The goal of Volume VII of Research in Science Education is to examine the relationship between science inquiry and servicelearning Its primary intent is to bridge the gaps between research and practice The volume is meant to be useful to science and service learning researchers and practitioners such as teachers and administrators because it provides information about strategies to integrate service learning into the science curriculum and instruction The main themes relate to such topics as Student science academic engagement and academic achievement Teacher instructional strategies in science and service learning Science curricula adaptation or development Civic responsibility of students and community partners Resiliency of students at risk Effect of standards based service learning and science on student outcomes such as academic engagement civic engagement and resiliency to adversity Specific case studies and strategies focus on how to Make learning more engaging Encourage collaboration among students teachers and

community partners Improve academic competence Create social civic responsibility Stimulate resiliency in students at risk Improve student interest in STEM subjects and majors Develop STEM career interests Improve the quality of science and service learning instruction through addressing standards Students can learn in teacher centered classrooms however a learner centered class that focuses on science inquiry and service learning is more authentic and engaging to learners This type of learning may not be the only way to teach however many educators believe that it is the best way for students to learn
