Waves: A Very Short Introduction Mike Goldsmith, 2018-11-15 We live in a world of waves The Earth shakes to its foundations the seas and oceans tremble incessantly sounds reverberate through land sea and air Beneath the skin our brains and bodies are awash with waves of their own and the Universe is filled by a vast spectrum of electromagnetic radiation of which visible light is the narrowest sliver Casting the net even wider there are mechanical waves quantum wave phenomena and the now clearly detected gravitational waves Look closer and deeper and more kinds of waves appear down to the most fundamental level of reality This Very Short Introduction looks at all the main kinds of wave their sources effects and uses Mike Goldsmith discusses how wave motion results in a range of phenomena from reflection diffraction interference and polarization in the case of light waves to beats and echoes for sound All waves however different share many of the same features and as Goldsmith shows for all their complexities many of their behaviours are fundamentally simple
