 specificities and global realities Coming from diverse academic specializations the contributors traverse the interface of their  
 respective disciplines with management education In doing so they engage with the ongoing global debate on management  
 education This volume fills a noticeable gap of serious scholarly reflection on the state of management education While there

 After two generations of emphasis on governmental inefficiency and the need for deregulation we now see growing interest  
 in the possibility of constructive governance alongside public calls for new smarter regulation Yet there is a real danger that  
 regulatory reforms will be rooted in outdated ideas As the financial crisis has shown neither traditional market failure models  
 nor public choice theory by themselves sufficiently inform or explain our current regulatory challenges Regulatory studies  
 long neglected in an atmosphere focused on deregulatory work is in critical need of new models and theories that can guide  
 effective policy making This interdisciplinary volume points the way toward the modernization of regulatory theory Its essays  
 by leading scholars move past predominant approaches integrating the latest research about the interplay between human  
 behavior societal needs and regulatory institutions The book concludes by setting out a potential research agenda for the
