Concrete Vol 5 Think Like A Mountain:

Think Like a Mountain Paul H. Chadwick, 2005 Part man part rock Over seven feet tall and weighing over a thousand pounds he is known as Concrete but is in reality the mind of one Ronald Lithgow trapped inside a shell of stone a body that allows him to walk unaided on the ocean's floor or survive the crush of a thousand tons of rubble in a collapsed mineshaft but prevents him from feeling the touch of a human hand These stories of Concrete are as rich and satisfying as any in comics funny heartbreaking and singularly human Concrete vol. 5: Think Like a Mountain Paul Chadwick, 2015-01-28 Being a celebrity has its benefits and its costs Due to his status as the world's most unusual travel writer being a thousand pounds of walking talking rock will do that Concrete is approached by a group of radical eco warriors to see firsthand and write about their efforts to save old growth forest What begins as a lark soon turns into a harrowing struggle and Concrete must decide whether to dispassionately observe or to join these people who would risk anything even life itself to save the planet Called the best comic being published by anyone anywhere Paul Chadwick's critically acclaimed Concrete is at once rousing fantasy and grounded reality as thought provoking and challenging as it is entertaining Think Like a Mountain collects the 1996 Parents Choice Award winning series along with bonus short stories some collected here for the first time This value priced volume collects Think Like a Mountain 16 short stories Like Disneyland Only Toxic Stay Tuned for Pearl Harbor A Billion Conscious Decisions Objects of Value Steel Rain various A Sky of Heads stories **EcoComix** Sidney I. Dobrin, 2020-09-17 Exploring image and imagination in conjunction with natural environments the animal and the human this collection of essays turns the ecocritical and ecocompositional gaze upon comic studies The comic form has a long tradition of representing environmental rhetoric Through discussions of comics including A D New Orleans After the Deluge We3 Concrete and Black Orchid these essays bring the rich work of ecological criticism into dialogue with the multi faceted landscape of comics graphic novels web comics cartoons and animation The contributors ask not only how nature and environment are portrayed in these texts but also how these textual forms inform how we come to know nature and environment or what we understand those terms to represent Interdisciplinary in approach this collection welcomes diverse approaches that integrate not only ecocriticism and comics studies but animal studies posthumanism ecofeminism queer ecology semiotics visual rhetoric and communication ecoseeing image text studies space and spatial theories writing studies media ecology ecomedia and other methodological approaches **The Power of Comics** Randy Duncan, Matthew J. Smith, 2009-07-01 A comprehensive introduction to the comic arts From the introduction by Paul Levitz If ever there was a medium characterized by its unexamined self expression it's comics For decades after the medium's birth it was free of organized critical analysis its creators generally disinclined to self analysis or formal documentation The average reader didn't know who created the comics how or why and except for a uniquely destructive period during America's witch hunting of the 1950s didn't seem to care As the medium has matured however and the creativity of comics began to touch the

mainstream of popular culture in many ways curiosity followed leading to journalism and eventually scholarship and so here we are The Power of Comics is the first introductory textbook for comic art studies courses Lending a broader understanding of the medium and its communication potential it provides students with a coherent and comprehensive explanation of comic books and graphic novels including coverage of their history and their communication techniques research into their meanings and effects and an overview of industry practices and fan culture Co authors randy Duncan and Matthew J Smith draw on their own years of experience teaching comics studies courses and the scholarly literature across several disciplines to create a text with the following features Discussion questions for each chapter Activities to engage readers Recommended reading suggestions Over 150 illustrations Bibliography Glossary The Power of Comics deals exclusively with comic books and graphic novels One reason for this focus is that no one text can hope to do justice to both strips and books there is simply too much to cover Preference is given to comic books because in their longer form the graphic novel they have the greatest potential for depth and complexity of expression As comic strips shrink in size and become more inane in content comic books are becoming a serious art form
