Proof Technology in Mathematics Research and Teaching Gila Hanna, David A. Reid, Michael de Villiers, 2019-10-02
This book presents chapters exploring the most recent developments in the role of technology in proving. The full range of topics related to this theme are explored including computer proving, digital collaboration among mathematicians, mathematics teaching in schools and universities and the use of the internet as a site of proof learning. Proving is sometimes thought to be the aspect of mathematical activity most resistant to the influence of technological change. While computational methods are well known to have a huge importance in applied mathematics, there is a perception that mathematicians seeking to derive new mathematical results are unaffected by the digital era. The reality is quite different. Digital technologies have transformed how mathematicians work together, how proof is taught in schools and universities and even the nature of proof itself. Checking billions of cases in extremely large but finite sets, impossible a few decades ago, has now become a standard method of proof. Distributed proving by teams of mathematicians working independently on sections of a problem has become very much easier as digital communication facilitates the sharing and comparison of results. Proof assistants and dynamic proof environments have influenced the verification or refutation of conjectures and ultimately how and why proof is taught in schools. And techniques from computer science for checking the validity of programs are being used to verify mathematical proofs. Chapters in this book include not only research reports and case studies but also theoretical essays, reviews of the state of the art in selected areas and historical studies. The authors are experts in the field. *Geometry* Nichols, 1991. A high school textbook presenting the fundamentals of geometry. **Teaching Mathematics Through Problem-Solving** Akihiko Takahashi, 2021-03-31. This engaging book offers an in-depth introduction to teaching mathematics through problem solving, providing lessons and techniques that can be used in classrooms for both primary and lower secondary grades. Based on the innovative and successful Japanese approaches of Teaching Through Problem Solving (TTP) and Collaborative Lesson Research (CLR), renowned mathematics education scholar Akihiko Takahashi demonstrates how these teaching methods can be successfully adapted in schools outside of Japan. TTP encourages students to try and solve a problem independently rather than relying on the format of lectures and walkthroughs provided in classrooms across the world. Teaching Mathematics Through Problem Solving gives educators the tools to restructure their lesson and curriculum design to make creative and adaptive problem solving the main way students learn new procedures. Takahashi showcases TTP lessons for elementary and secondary classrooms, showing how teachers can create their own TTP lessons and units using techniques adapted from Japanese educators through CLR. Examples are discussed in relation to the Common Core State Standards, though the methods and lessons offered can be used in any country. Teaching Mathematics Through Problem Solving offers an innovative new approach to teaching mathematics, written by a leading expert in Japanese mathematics education, suitable for pre-service and in-service primary and secondary math educators. *Advances in Mathematics*

Education Research on Proof and Proving Andreas J. Stylianides,Guershon Harel,2018-01-10 This book explores new trends and developments in mathematics education research related to proof and proving the implications of these trends and developments for theory and practice and directions for future research With contributions from researchers working in twelve different countries the book brings also an international perspective to the discussion and debate of the state of the art in this important area The book is organized around the following four themes which reflect the breadth of issues addressed in the book Theme 1 Epistemological issues related to proof and proving Theme 2 Classroom based issues related to proof and proving Theme 3 Cognitive and curricular issues related to proof and proving and Theme 4 Issues related to the use of examples in proof and proving Under each theme there are four main chapters and a concluding chapter offering a commentary on the theme overall *Addison-Wesley Informal Geometry* ,1992 *Hands-On Math!* Frances McBroom Thompson,1994-05-10 This comprehensive resource addresses 93 basic math concepts and skills and promotes students understanding of math by encouraging them to apply math concepts to their own lives Over 275 games and activities are included **HP Clearinghouse for Applications of Computers to Education** ,1975 **Visual Education** ,1979 Beginning with 195 one monthly issue called Visual aids yearbook **The Modern Mathematics Series** ,1963 *The Teaching of Secondary School Mathematics* National Council of Teachers of Mathematics,1970 *Yearbook* ,1970 **Index to Media and Materials for the Mentally Retarded, Specific Learning Disabled, Emotionally Disturbed** National Information Center for Special Education Materials,1978
