Covering China From Cyberspace In 2014:

Covering China from Cyberspace in 2014 China Digital Times,2015-01-15 Covering China from Cyberspace in 2014 reviews the year s major events as seen through the eyes of Chinese censors and the netizens who are brave enough to defy them A crackdown on free speech and activism that began as soon as President Xi Jinping took office in 2012 only intensified and broadened throughout 2014 A steady stream of filtered search terms and propaganda directives guided coverage and discussion of a broad variety of topics and stories from Xi s visit to a steamed bun shop to the arrest of former security chief Zhou Yongkang The 25th anniversary of June 4th and the protest movement in Hong Kong were both among the most strictly censored stories in China in recent memory But the harsh tactics used by authorities to silence their critics did not work to intimidate the most outspoken Internet users who continued to find creative ways to express themselves This yearbook is not an effort to chronicle everything that happened in China this past year Rather it provides a unique lens on some of the biggest stories in China in 2014 by compiling the best of the news reports analysis Internet commentary propaganda directives cartoons and other images Covering China from Cyberspace in 2014 is a valuable resource for China analysts journalists students and others who wish to broaden their knowledge and understanding of recent events in the country

China's Cyber Warfare Jason R. Fritz,2017-03-21 The turn of the century was accompanied by two historically significant phenomena One was the emergence of computer networks as a vital component of advanced militaries and interdependent global economic systems The second concerned China s rise on the global stage through economic reforms that led to sustained growth and military modernization At the same time Chinese government policies and actions have drawn international criticisms including persistent allegations of online espionage domestic Internet censorship and an increased military capability all of which utilize computer networks These threat perceptions are heightened by a lack of transparency Unlike the United States or the North Atlantic Treaty Organization China does not articulate its strategic doctrine Further open source material on this topic is often contradictory cursory and unclear due in part to the absence of consensus on cyber related terminology and the infancy of this field With a focus on the period 1998 to 2016 this book identifies and analyzes the strategic context conceptual framework and historical evolution of China s cyber warfare doctrine
