If you have an HD-capable television connected via a Coax connection, you will be able to view TV Series and TV Essential channels in High Definition by tuning to either the low-light or three-digit Standard Definition channel or the corresponding HD Channel in the HD menu range. For example, with a Coax link, the Weather Channel may be viewed in HD on either channel 62 or channel 104-105 (the Weather Channel numbers in your market may be different). If your television is connected via equipment other than a coax link, such as a Coax-to-HDMI converter or a Coax-to-DVI adapter, HD reception will not be available. Additionally, some older HD-capable televisions may not support the required video format, such as 1080i, which may result in degraded picture quality.
