Deursen, 2022-09-01 Cybersecurity needs a change in communication It is time to show the world that cybersecurity is an exciting and diverse field to work in Cybersecurity is not only about hackers and technical gobbledygook It is a diverse field of work with a lot of collaboration with other disciplines Over the years security professionals have tried different awareness strategies to promote their work and to improve the knowledge of their audience but without much success Communication problems are holding back advances in the field *Visual Communication for Cybersecurity* explores the possibilities of visual communication as a tool to improve the communication about cybersecurity and to better connect with non experts Visual communication is useful to explain complex topics and to solve complex problems Visual tools are easy to share through social media and have the possibility to reach a wide audience When applied strategically visual communication can contribute to a people centric approach to security where employees are encouraged to actively engage in security activities rather than simply complying with the policies Cybersecurity education does not usually include communication theory or creative skills Many experts think that it is not part of their job and is best left to the communication department or they

think that they lack any creative talent This book introduces communication theories and models gives practical tips and shows many examples The book can support students in cybersecurity education and professionals searching for alternatives to bullet point presentations and textual reports On top of that if this book succeeds in inspiring the reader to start creating visuals it may also give the reader the pleasure of seeing new possibilities and improving their performance **Hypoxia**
