Transformative Pedagogical Perspectives on Home Language Use in Classrooms Jules, Janice E., Belgrave, Korah L., 2020-09-25 Linguists researchers and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners self identities and national identities is ongoing In fact even with decades of research in home language use in the classroom there are still classrooms worldwide where learners are deprived of the opportunity of building their self esteem confidence

and autonomy by communicating with their native language The global nature of communication requires speakers to use all the languages in their repertoire effectively thus reinforcing the need to encourage home language use in classrooms Transformative Pedagogical Perspectives on Home Language Use in Classrooms is a cutting edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills In addition the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self identity and national identity Highlighting topics such as engineering education cultural responsiveness and transformative pedagogy this book is essential for linguists academicians education professionals curriculum designers policymakers administrators instructional designers researchers and students The Ecclesiastical gazette, or, Monthly register of the affairs of the Church of England ,1845
