Advanced Intelligent Computing Technology and Applications De-Shuang Huang, Qinhu Zhang, Chuanlei Zhang, Wei Chen, 2025-07-25 The 20 volume set LNCS 15842 15861 together with the 4 volume set LNAI 15862 15865 and the 4 volume set LNBI 15866 15869 constitutes the refereed proceedings of the 21st International Conference on Intelligent Computing ICIC 2025 held in Ningbo China during July 26 29 2025 The 1206 papers presented in these proceedings books were carefully reviewed and selected from 4032 submissions They deal with emerging and challenging topics in artificial intelligence machine learning pattern recognition bioinformatics and computational biology **Handbook of Research on Advanced Research Methodologies for a Digital Society** Punziano, Gabriella, Delli Paoli, Angela, 2021-09-03 Doing research is an ever changing challenge for social scientists This challenge is harder than ever today as current societies are changing quickly and in many sometimes conflicting directions Social phenomena personal interactions and formal and informal relationships are becoming more borderless and disconnected from the anchors of the offline reality These dynamics are heavily marking our time and are suggesting evolutionary challenges in the ways we know interpret and analyze the world Internet and computer mediated communication CMC is being incorporated into every aspect of daily life and social life has been deeply penetrated by the internet This is due to recent technological developments that increase the scope and range of online social spaces and the forms and time of participation such as Web 2 0 which widened the opportunities for user generated content the emergence of an internet of things and of ubiquitous mobile devices that make it possible to always be connected This implies an adjustment to epistemological and methodological stances for conducting social research and an adaption of traditional social research methods to the specificities of online interactions in the digital society The Handbook of Research on Advanced Research Methodologies for a Digital Society covers the different strands of methods most affected by the change in a digital society and develops a broader theoretical reflection on the future of social research in its challenge to always be fitting suitable adaptable and pertinent to the society to be studied The chapters are geared towards unlocking the future frontiers and potential for social research in the digital society They include theoretical epistemological and ontological reflections about the digital research methods as well as innovative methods and tools to collect analyze and interpret data This book is ideal for social scientists practitioners librarians researchers academicians and students interested in social research methodology and its developments in the digital scenario **Algorithms in Advanced Artificial Intelligence** R. N. V. Jagan Mohan, B. H. V. S. Rama Krishnam Raju, V. Chandra Sekhar, T. V. K. P. Prasad, 2025-05-23 Algorithms in Advanced Artificial Intelligence is a collection of papers on emerging issues challenges and new methods in Artificial Intelligence Machine Learning Deep Learning Cloud Computing Federated Learning Internet of Things and Blockchain technology It addresses the growing attention to advanced technologies due to their ability to provide paranormal solutions to problems associated with classical Artificial Intelligence frameworks AI is used in various subfields

including learning perception and financial decisions It uses four strategies Thinking Humanly Thinking Rationally Acting Humanly and Acting Rationally The authors address various issues in ICT including Artificial Intelligence Machine Learning Deep Learning Data Science Big Data Analytics Vision Internet of Things Security and Privacy aspects in AI and Blockchain and Digital Twin Integrated Applications in AI *Advanced Computational Intelligence Techniques for Engineers* T. Joshva Devadas,Naveenkumar Jayakumar,N. Narayanan Prasanth,P. Anandhakumar,Shrikant Jadhav,2025-12-29 This book presents a thorough examination of computational intelligence and its significant influence on solving intricate engineering challenges It covers fundamental theories as well as advanced applications illustrating how techniques in computational intelligence are transforming engineering practices The book is organized into distinct sections each concentrating on specific engineering domains in which computational intelligence assumes a critical role The book presents a methodical coverage of computational intelligence principles and techniques illustrated by examples from various engineering domains emphasizes a problem solving approach demonstrating how computational intelligence can be used to tackle complex problems offers use cases and real world examples to facilitate targeted learning and understanding and includes discussion on ethical considerations advocating for the responsible use of technology and consideration of societal impacts This reference book is for engineers researchers and scholars interested in computational intelligence techniques in engineering **GENERATIVE AI INNOVATIONS: Exploring Advanced Techniques and Applications in Modern AI** DR. A. SEENU,DR. P. R. SUDHA RANI, Digital Ecosystems: Interconnecting Advanced Networks with AI Applications Andriy Luntovskyy,Mikhailo Klymash,Igor Melnyk,Mykola Beshley,Alexander Schill,2024-07-29 This book covers several cutting edge topics and provides a direct follow up to former publications such as Intent based Networking and Emerging Networking bringing together the latest network technologies and advanced AI applications Typical subjects include 5G 6G clouds fog leading edge LLMs large scale distributed environments with specific QoS requirements for IoT robots machine and deep learning chatbots and further AI solutions The highly promising combination of smart applications network infrastructure and AI represents a unique mix of real synergy Special aspects of current importance such as energy efficiency reliability sustainability security and privacy telemedicine e learning and image recognition are addressed too The book is suitable for students professors and advanced lecturers for networking system architecture and applied AI Moreover it serves as a basis for research and inspiration for interested professionals looking for new challenges *How Machine Learning is Innovating Today's World* Arindam Dey,Sukanta Nayak,Ranjan Kumar,Sachi Nandan Mohanty,2024-06-18 Provides a comprehensive understanding of the latest advancements and practical applications of machine learning techniques Machine learning ML a branch of artificial intelligence has gained tremendous momentum in recent years revolutionizing the way we analyze data make predictions and solve complex problems As researchers and practitioners in the field the editors of this book recognize the importance of disseminating knowledge and fostering collaboration to further advance this dynamic discipline How Machine Learning is

Innovating Today's World is a timely book and presents a diverse collection of 25 chapters that delve into the remarkable ways that ML is transforming various fields and industries. It provides a comprehensive understanding of the practical applications of ML techniques. The wide range of topics include: An analysis of various tokenization techniques and the sequence to sequence model in natural language processing; explores the evaluation of English language readability using ML models; a detailed study of text analysis for information retrieval through natural language processing; the application of reinforcement learning approaches to supply chain management; the performance analysis of converting algorithms to source code using natural language processing in Java; presents an alternate approach to solving differential equations utilizing artificial neural networks with optimization techniques; a comparative study of different techniques of text to SQL query conversion; the classification of livestock diseases using ML algorithms; ML in image enhancement techniques; the efficient leader selection for inter cluster flying ad hoc networks; a comprehensive survey of applications powered by GPT-3 and DALL-E; recommender systems; domain of application reviews; mood detection; emoji generation and classification using tokenization; and CNN variations of the exam scheduling problem using graph coloring; the intersection of software engineering and machine learning applications; explores ML strategies for indeterminate information systems in complex bipolar neutrosophic environments; ML applications in healthcare; in battery management systems; and the rise of AI-generated news videos; how to enhance resource management in precision farming through AI-based irrigation optimization.

Audience: The book will be extremely useful to professionals, post graduate research scholars, policymakers, corporate managers, and anyone with technical interests looking to understand how machine learning and artificial intelligence can benefit their work.
