Main features

Simple Operation—Works Like a Compact Effects Processor

Each effect is controlled with a dedicated knob. Intuitive operation, similar to that of compact effects processors, lets you make changes to tones directly.

Powerful COSM Drive Sound

Roland's original "COSM" modeling technology lets you perform with a wide variety of powerful distortion effects, from classic vintage sounds, to original distortion sounds.

COSM (Composite Object Sound Modeling)

Composite Object Sound Modeling (COSM) is Roland's innovative and powerful sound modeling technology. COSM analyzes the many factors that make up the original sound, such as the electrical and physical characteristics of the original, and then produces a digital model that can reproduce the same sound.

Multi-Function Expression Pedal

The ME-50 is equipped with an expression pedal that gives you control over six different specialized pedal effects. It can also be switched for use as a volume pedal.

Memory Function

You can store up to 30 original tones you have created. You can also use the pedals in "Memory mode" to call up stored tones instantly.

AUX IN Jack

The AUX IN jack makes it easy to practice along with CDs, MDs, and other input.

Battery-Powered Operation

The ME-50 can be powered in two ways, with (6) AA batteries or by using the AC adaptor (optional).
