CCE Exam Self-Practice Review Questions for Certified Cost Engineer ExamREVIEW,2014-12-12 The CCE Certification requires that an individual has an education and or work experience in a related field more precisely a field that emphasizes cost management The candidate must demonstrate acquired knowledge through successfully passing a written exam after

submitting an acceptable technical paper on a cost engineering subject This professional paper must be at least 2 500 words The actual CCE exam has four parts that are 1 hour and 45 minutes each Part I has 50 multiple choice questions Parts II III and IV use a combination of compound questions and multiple choice questions Coverage is extensive Also with the introduction of the TCMF multiple disciplines are integrated into the cost management effort so you are expected to know a lot more than basic cost estimation and control techniques Even though the exam is divided into 4 parts you will have to take 4 parts in the same day Also topics covered in the different parts are in fact highly related Therefore there is no reason why you should study on a part by part basis We highly recommend that you study for the exam as a whole this will give you a clearer picture on the big picture and on the various details You may think of cost engineering as an adjunct of traditional engineering The key objectives of cost engineering are 1 to arrive at accurate cost estimates and 2 to avoid cost overruns Cost engineering encompasses a wide range of cost related aspects of engineering management Keep in mind awareness of the related costs is a key factor in making the proper choice of engineering approaches to take Although the cost engineering exam focuses primarily on the various cost analysis and estimation techniques basic background knowledge of certain business management related disciplines will definitely help for those who have little experience on topics outside of the scope of traditional engineering To be honest without possessing solid knowledge on these topics a candidate will have a very tough time mastering the skills of cost engineering This is especially true when the TCMF Total Cost Management Framework methodology is in place to integrate Asset Operations and Project Management into a single model We create these self practice test questions referencing the concepts and principles currently valid in all these exams Each question comes with an answer and a short explanation which aids you in seeking further study information For purpose of exam readiness drilling this product includes questions that have varying numbers of choices Some have 2 while some have 5 or 6 We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas Think of these as challenges presented to you so to assess your comprehension of the subject matters The goal is to reinforce learning to validate successful transference of knowledge and to identify areas of weakness that require remediation The questions are NOT designed to simulate actual exam questions realistic or actual questions that are for cheating purpose are not available in any of our products
