Cellular And Molecular Neurophysiology:

Cellular and Molecular Neurophysiology Constance Hammond, 2015-01-02 This new thoroughly revised fourth edition is the only current established and authoritative text focusing on the cellular and molecular physiology of nerve cells. Understanding the functioning of the neuron, the basic cell of the central nervous system, requires a clear understanding of the cellular and molecular physiology of the neuron. The book is hypothesis driven rather than just presenting the facts, and the content is firmly based on numerous experiments performed by the top experts in the field. While the book does cover the important facts, it also presents the background for how researchers arrived at this knowledge to provide a context for the field. It teaches not only how excitable cells work in detail but also how to construct and conduct intelligent research experiments. This book promotes a real understanding of the function of nerve cells that is useful for practicing neurophysiologists and students in a graduate level course on the topic. Alike 70% new or updated material in full color throughout with more than 350 carefully selected and constructed illustrations. Fifteen appendices describing neurobiological techniques are interspersed in the text. Accompanying Instructor website with exercises and Companion website available.

Cellular and Molecular Neurophysiology Constance Hammond, 2008-02-06 Cellular and Molecular Neurophysiology Third Edition is the new thoroughly revised edition of the only current established and authoritative text focusing on the cellular and molecular physiology of nerve cells. Previously titled Cellular and Molecular Neurobiology, the new title better reflects this focus. This version contains 80% new or updated material. Fifteen appendices describing neurobiological techniques are interspersed in the text. Now in full color throughout, the book has over 400 carefully selected and constructed illustrations. It includes an instructor website with all the images in electronic format plus additional material.
