television as well as outdoor and supermarket advertising In addition the amount and diversity of visual marketing stimuli is rapidly growing in terms of different advertising formats appearing in online and social media smartphones and tablets This challenges the marketing professionals and academics to better understand the impact of marketing on consumers At the same time the technical development of the research methods allows better opportunities to investigate advertising perception in different environments Traditionally papers investigating the psychological processes underlying advertising perception are published in journals widespread across different disciplines such as marketing applied psychology and human computer interaction journals With this Research Topic we aim to create a forum in which experts in different fields define the state of the art and future directions of the research on the visual aspects of marketing We include reviews and original research papers involving both empirical and theoretical studies on visual perception of advertising across different media **The Times Index** ,2013-02 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement
