Mulargia, R.J. Geller, 2012-12-06 What is the first thing that ordinary people for whom journalists are the proxy ask when they
meet a seismologist It is certainly nothing technical like What was the stress drop of the last earthquake in the Imperial
Valley It is a simple question which nevertheless summarizes the real demands that society has for seismology This question
is Can you predict earthquakes Regrettably notwithstanding the feeling of omnipotence induced by modern technology the
answer at present is the very opposite of Yes of course The primary motivation for the question Can you predict earthquakes
is practical No other natural phenomenon has the tremendous destructive power of a large earthquake a power which is
rivaled only by a large scale war An earthquake in a highly industrialized region is capable of adversely affecting the econ
