

NUCLEAR CHEMISTRY WORKSHEET

Name _____ Date _____ Block _____

Most nuclear reactions involve changes in the number of protons and/or neutrons in the nucleus of an atom. These changes are called *transmutations* because an atom of one element is changed into an atom of a different element. During these changes, nuclear particles may be absorbed and/or emitted along with a release of energy.

There are four types of nuclear reactions:

- 1) *natural radioactive decay*: transmutations occur by natural radioactivity (the ability of a nucleus to emit a nuclear particle and energy without external stimulation);
- 2) *artificial transmutation*: transmutations occur by nuclear disintegration caused by external stimulation as a scientist bombards a nucleus with a particle (the addition of another nuclear particle makes the nucleus unstable);
- 3) *fission*: certain nuclei having a large mass are bombarded with special particles that cause the nuclei to split into two nuclei each having a smaller mass;
- 4) *fusion*: nuclei of light elements are combined to form heavier nuclei.

Nuclear reactions are written using symbols in the A_ZX notation. The symbols for the major nuclear particles involved in nuclear reactions are given below.

Alpha particle	${}^4_2\text{He}$ (an alpha particle is a helium nucleus)
Proton	${}^1_1\text{H}$ (the most common hydrogen nucleus is a proton)
Neutron	${}^1_0\text{n}$
Electron	${}^0_{-1}\text{e}$ or ${}^0_{-1}\beta$ (also called a beta particle)
Positron	${}^0_1\text{e}$ or ${}^0_1\beta$
Gamma ray	${}^0_0\gamma$

The table below contains information about nuclear reactions involving the emission of radiation.

Type of Reaction	NUCLEAR CHANGES		
	Radiation (Particle)	Effect on the Atomic Number	Effect on the Atomic Mass
Alpha emission (α)	${}^4_2\text{He}$	decrease by 2	decrease by 4
Beta emission (β)	${}^0_{-1}\text{e}$ or ${}^0_{-1}\beta$	increase by 1	no change
Positron emission (β^+)	${}^0_1\text{e}$ or ${}^0_1\beta$	decrease by 1	no change
Gamma emission	${}^0_0\gamma$	no change	no change
Electron capture (EC)	${}^0_{-1}\text{e}$ or ${}^0_{-1}\beta$	decrease by 1	no change

Basic Concepts of Chemistry, 9e Study Guide and Solutions Manual Leo J. Malone, Theodore O. Dolter, 2012-01-03 The 9th edition of Malone's Basic Concepts of Chemistry provides many new and advanced features that continue to address general chemistry topics with an emphasis on outcomes assessment. New and advanced features include an objectives grid at the end of each chapter which ties the objectives to examples within the sections, assessment exercises at the end of each section and relevant chapter problems at the end of each chapter. A new Math Check allows quick access to the needed basic skill. The first chapter now includes brief introductions to several fundamental chemical concepts and Chapter Synthesis Problems have been added to the end of each chapter to bring key concepts into one encompassing problem. Every concept in the text is clearly illustrated with one or more step-by-step examples. Making it Real essays have been updated to present timely and engaging real-world applications emphasizing the relevance of the material they are learning. This edition continues the end of chapter Student Workshop activities to cater to the many different learning styles and to engage users in the practical aspect of the material discussed in the chapter. Smoot, Smoot, Richard G. Smith, Jack Price, 1998 Chemistry3 Andrew Burrows, John Holman, Simon Lancaster, Andrew Parsons, Tina Overton, Gwen Pilling, Gareth Price, 2021 Chemistry is widely considered to be the central science; it encompasses concepts on which all other branches of science are developed. Yet for many students entering university, gaining a firm grounding in chemistry is a real challenge. Chemistry3 responds to this challenge, providing students with a full understanding of the fundamental principles of chemistry on which to build later studies. Uniquely amongst the introductory chemistry texts currently available, Chemistry3's author team brings together experts in each of organic, inorganic, and physical chemistry, with specialists in chemistry education, to provide balanced coverage of the fundamentals of chemistry in a way that students both enjoy and understand. The result is a text that builds on what students know already from school and tackles their misunderstandings and misconceptions, thereby providing a seamless transition from school to undergraduate study. Written with unrivalled clarity, students are encouraged to engage with the text and appreciate the central role that chemistry plays in our lives through the unique use of real-world context and photographs. Chemistry3 tackles head-on two issues pervading chemistry education: students' mathematical skills and their ability to see the subject as a single unified discipline. Instead of avoiding the maths, Chemistry3 provides structured support in the form of careful explanations, reminders of key mathematical concepts, step-by-step calculations in worked examples, and a Maths Toolkit to help students get to grips with the essential mathematical element of chemistry. Frequent cross-references highlight the connections between each strand of chemistry and explain the relationship between the topics so students can develop an understanding of the subject as a whole. Digital formats and resources Chemistry3 is available for students and

institutions to purchase in a variety of formats and is supported by online resources The e book offers a mobile experience and convenient access along with functionality tools navigation features and links that offer extra learning support www.oxfordtextbooks.co.uk/ebooks The e book also features interactive animations of molecular structures screencasts in which authors talk step by step through selected examples and key reaction mechanisms and self assessment activities for each chapter The accompanying online resources will also include for students DT Chapter 1 as an open access PDF DT Chapter summaries and key equations to download to support revision DT Worked solutions to the questions in the book The following online resources are also provided for lecturers DT Test bank of ready made assessments for each chapter with which to test your students DT Problem solving workshop activities for each chapter for you to use in class DT Case studies showing how instructors are successfully using Chemistry3 in digital learning environments and to support innovative teaching practices DT Figures and tables from the book

Revolutionary Movements in Latin America Cynthia McClintock, 1998 Why were El Salvador's FMLN and Peru's Shining Path able to mount such serious revolutionary challenges in the 1980s and early 1990s And why were they able to do so despite the fact that their countries elected governments were widely considered democratic These two guerrilla groups were very different but both came close to success To explain why the author examines the complex interplay among political and economic factors the nature of the revolutionary organization and international actors McClintock emphasizes that the end of the Cold War does not mean the end of revolutionary groups and that the United States can play an important role in determining the outcome of future confrontations The book concludes with practical policy options for the U S government as it looks to foster peace and democracy in the western hemisphere

Sociology Jon M. Shepard, 1999 This comprehensive mainstream text presents the basic theoretical conceptual and methodological tenets of sociology in a readable and personal manner Its balanced presentation challenges students to pose their own questions about society and to think critically about the world in which they live It presents the study of sociology as a means by which students can transcend personal and societal prejudices This Seventh Edition continues its tradition of integrating innovative pedagogy directly into the book such as a built in student study guide lecture launching CNN video segments that link to text specific topics and continued use of the SQ3R survey question read recite and review learning technique
