Lennox, 2021-05-20 Aristotle is a rarity in the history of philosophy and science he is a towering figure in the history of both disciplines Moreover he devoted a great deal of philosophical attention to the nature of scientific knowledge How then do his philosophical reflections on scientific knowledge impact his actual scientific inquiries In this book James Lennox sets out to answer this question He argues that Aristotle has a richly normative view of scientific inquiry and that those norms are of two kinds a general question guided framework applicable to all scientific inquiries and domain specific norms reflecting differences in the target of inquiry and in the means of observation available to researchers To see these norms of inquiry in action the second half of this book examines Aristotle s investigations of animals the soul material compounds the motions of heavenly bodies and respiration

**Professions and Proficiency** Johannes Glückler, Christopher Winch, Anna Mateja Punstein, 2023-03-16 This open access book takes an original view on the social production of knowledge in and across space It explores how people build and transfer proficiency within and beyond the bounds of social groups Social groups such as professions epistemic communities or academic disciplines collectively organize to help individuals gain understanding of and knowledge about specific subjects of expertise Yet at the same time they frame legitimate ways of thinking and learning and they sanction other ways of knowing that are collectively seen as false inelegant or inappropriate etc Acknowledging the interdependency between proficiency and professions the interdisciplinary contributions to this volume focus on three aspects Part I looks into the

social processes of professions and what actually makes qualifications competence and proficiency Part II elaborates on the dynamics that transform intangible knowledge by exploring for instance the legitimacy of scientists within society Part III gives insights into how space influences the development of professional work for instance by reconstructing the historical formation of the psychology profession in Argentina This volume provides a valuable read for scholars students and

Julia Minors, Stefan Östersjö, Gilvano Dalagna, Jorge Salgado Correia, 2024-05-27 Higher Music Performance Education as taught and learned in universities and conservatoires in Europe is undergoing transformation Since the nineteenth century the master apprentice pedagogical model has dominated creating a learning environment that emphasises the development of technical skills rather than critical and creative faculties This book contributes to the renewal of this field by being the first to address the potential of artistic research in developing student centred approaches and greater student autonomy This potential is demonstrated in chapters illustrating artistic research projects that are embedded within higher music education courses across Europe with examples ranging from instrumental tuition and ensemble work to the development of professional employability skills and inclusive practices Bringing together diverse and experienced voices working within Higher Music Education but often also as professional performers this edited collection pairs critical reflection with artistic insight to present new approaches to curricula for teaching interpretation and performance It calls for greater collaboration between Higher Education and professional music institutions to create closer bonds with music industries and thereby improve students career opportunities Teaching Music Performance in Higher Education will appeal to scholars performers teachers but also students whose interests centre on innovative practices in conservatoires and music departments
