project plus review citations Cyber Worship in Multifaith Perspectives Mohamed Taher,2006 Cyber Worship in Multifaith  
Perspectives as is implied by its name explores worship i e Prayer Praise Scripture Sacrament Rituals Confessions Eucharist  
Rites Pilgrimages Reflection Contemplation etc on the Internet It is not an everything you need to know guide about the  
subjects of faith and belief religions online religions on the Net or religions in cyberspace Rather it is a book about religious  
and spiritual experience under the rubric cyber worship which is the variety of ways religious devotion is performed and  
carried out on the Internet The term Cyber Worship is a catchall phrase which includes variants such as online worship  
virtual worship electronic prayer cyber puja cyber synagogue and so on Dr Mohamed Taher has thus assembled a quick  
reference for two groups those communities that are involved in Cyber Worship and business Webs that collaborate in  
sustaining wired environments As such this book provides an interesting and current perspective on a practice that will  
continue to grow in the future **Hypertext 3.0** George P. Landow,2006 Thoroughly expanded and updated this pioneering  
work continues to be the ur text of hypertext studies *Methodologies in Peace Psychology* Diane Bretherton,Siew Fang  
Law,2015-09-03 This volume looks at research methods through the lens of peace studies and peace values Apart from  
reviewing established methods from peace psychology it presents some innovative ideas for conducting research in the area  
of peace psychology Many of these methods are drawn from the field from activities used by active peace practitioners A  
critical component of this volume is its core argument that peace research should be conducted by peaceful means and  
should model peaceful processes Organized thematically the volume begins with a review of the established best practices in  
peace psychology research methodology including methods for qualitative research for quantitative research and  
participative action networks In doing so it also points to some of the limitations of working for peace within the tradition of a  
single discipline and to the need to expand psychology methodology to methodologies Therefore the second half of the  
volume proceeds to explore the realm of innovative relatively unorthodox research methods such as participatory and  
workshop methods the creative arts and sports for research purposes The use of new advances in information technology to  
conduct peaceful research are also discussed The concluding chapters synthesize key issues from the previous chapters and  
links peace psychology with ideas and implementation of research designs and practices Finally it discusses the nature of  
academic knowledge and more specifically academic knowledge in peace psychology and where that fits into the mission to

build a more peaceful world Overall this book aims to provide peace psychologists with an array of possibilities and best practices for approaching their research Many researchers find the experience of doing research a somewhat lonely if not isolating experience Methodologies in Peace Psychology Peace Research by Peaceful Means aims to alleviate this feeling as the use of these more innovative methods leads to a closer engagement with the community and a much more social experience of research This volume is a useful tool for both new and experienced researchers because it provides leads for idealistic young researchers who want their work to make a difference in addition to encouraging more reflection and analysis for experienced peace psychologists
