

Preparation: Refer to Figure 1.

[Method 1 Installation: Vent to atmosphere]

1.) Locate an open area inside the engine bay to mount the oil catch tank.

 Do not place oil catch tank near rotating objects such as fan belts and heated components such as the exhaust area.

2.) Install main bracket onto oil catch tank by using the included M6 x 25 bolt and M6 raised nut and temporarily bolt down the oil catch tank inside the engine bay using the remainder of the brackets. Once the location has been decided, hand torque the nut/bolt using a wrench.

3.) Remove one end of the factory blow-by hose from engine valve cover.

4.) Cap off the opening of this hose by using the included stop plug and tuck the hose away to a secure area where it will not conflict with any normal engine operation.

5.) Install the included braided hose to the valve cover opening and secure it with the hose band clamp. Make sure there is enough slack when cutting the braided hose to the desired length.

6.) Install the other open end of the braided hose to the oil catch tank and secure it with the hose band clamp.

7.) Use the included zip ties to secure the hose away from making contact with any moving components.
