Your students will find themselves climbing mountains, diving into the oceans, and launching into the skies on a quest to learn how the world works. During this quest, students will find that Earth science is also a battle of worldviews. This text clearly introduces students to the secular theories of where everything they see came from. They critique these theories. For each secular theory, the text affirms the conservative biblical view of Earth's history shaped by Creation, the Fall, and the Flood. Students' Christian worldviews will be shaped and strengthened as they learn about tectonic processes, landforms, and earth materials, fossils, the oceans, and oceanography, rivers and lakes, the atmosphere, weather, and storms, climate, and environmentalism, the solar system, the universe, and cosmology, and space science. Earth Science 5th Edition Student Text moves the student from the lithosphere of the earth itself to the hydrosphere in and on the earth to the atmosphere surrounding the earth and finally out into space, visiting the solar system and the rest of the universe. All of this is a quest to understand God's created world. Case studies and other activities encourage students to think like scientists as they develop a biblical perspective of earth and space.
