Bkat Icu Test:

Manual of Simulation in Healthcare Richard H. Riley, 2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide Simulation and skills centres have become established to integrate simulation into mainstream education in all medical nursing and paramedical fields Borrowing from the experience and methodologies of industries that are using simulation medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation Simulation has been used to enhance the educational experience in a diverse range of fields therefore a wide variety of disciplines are represented The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development and promotion Section two deals with simulators and related training devices that are required to equip a stand alone or institution based centre The features strengths and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements There is a guide to producing scenarios and medical props that can enhance the training experience The third section covers adult education and it reviews the steps required to develop courses that comply with best practice in medical education Teaching skills facilitating problem based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education The manual concludes with guides for the major specialties that use simulation including military paediatrics CPR and medical response teams obstetrics and anesthesia

The Educational Process in Nursing Staff Development JoAnn Alspach, 1995 **Directory of Nurse Researchers**, 1990 Alphabetical listing by names of nurses active in research Entries give information regarding professional educational and research activities Also lists researchers by topics geographical location language and animal model used Index of research topics

Critical Care Study Guide Gerard J. Criner, Gilbert E. D'Alonzo, 2002 This is the first comprehensive study guide covering all aspects of Critical Care Medicine The condensed format of coverage is unique it supplies a heavily illustrated text with self assessment questions and answers This approach will help the reader to determine the correct answer The text is supported by case studies tables and illustrations which will describe important procedures Also the selected readings and references will focus on the field s leading major references so this book will be the ideal complement to previously published literature This is useful for physicians and those in training who see patients in the ICU
