An illustrated guide to getting started with the PMDG 747

Getting Started

This guide will:

- guide you through the standard startup, taxi, takeoff, climb, cruise, approach, and landing procedures for the [PMDG 747](#).
- provide an illustrated guide to the major systems and controls of the 747.
- provide an simple, logical, and easy to understand method for operating the 747 similarly to real-world operations.

This guide will NOT:

- be a substitute for the official PMDG manual.
- teach you all operations of the aircraft.
- teach you how to program and use the FMC beyond what is needed to minimally operate the aircraft.
- teach you about or how to fully use the autopilot functions.

You will notice that this guide deviates from the published Normal Procedures checklist. This is done to facilitate learning the 747 systems, to save time, and to only focus on the systems that are likely to be necessary to establish an operational aircraft. I believe all of the procedures and information here to be factual, though it is often overly simplified and not necessarily in the correct order. If there is something that is incorrect or unclear, please [let me know](#). IF YOU HAVE QUESTIONS REGARDING THE OPERATION OF THE AIRCRAFT, REFER TO THE MANUAL OR POST THEM TO THE PMDG SUPPORT FORUM. I WILL NOT ANSWER STUPID QUESTIONS THAT ARE ANSWERED ELSEWHERE. :-) On the other hand, if you have a legitimate question or concern, please contact me and I'll be happy to respond.

Requirements:

- The [PMDG 747](#).
- Your aircraft positioned at a gate a KLAX (this tutorial uses gate I1).
- 1/3 or less fuel in the fuel tanks. This can be set in the PMDG... General... Options... Fuel settings.
- A cold and dark cockpit.

I STRONGLY recommend [downloading this cold/dark scenario and flight plan](#) as all graphics and panel
