

Career Attitudes and Strategies Inventory™

John L. Holland, PhD and Gary D. Gottfredson, PhD

This booklet contains some statements people sometimes make about their work — about the good and bad feelings, attitudes, and experiences people have from time to time.

The statements are not really “true” or “false.” They are opinion statements that you may feel are more true than false — or more false than true. Although it is sometimes awkward, please indicate whether each statement is true, mostly true, mostly false, or false. You need not answer any question you prefer to omit, but this inventory will be most helpful if you answer every question.

Completing this inventory is one step in sorting out your own attitudes about your work and your career plans. You may find that these questions stimulate you to consider aspects of your career that you tend to ignore.

Describe your current work. If you are unemployed, describe your most recent job, volunteer experience, or unpaid work.

When you have filled in the answer sheet, follow the directions on the second page of your answer sheet to score your inventory.

Instructions

Please mark answers by circling one letter on the answer sheet to show how you think or feel about each statement.

- | | |
|---|--------------|
| F | False |
| F | Mostly false |
| T | Mostly true |
| T | True |

For example, if you feel that a statement is mostly true about you, you would circle the T on your answer sheet.

Example: F F (T) T

Press firmly. Your responses are being transferred to a second page that you will use to summarize your answers. If you make a mistake or change your mind, mark an X through the answer you wish to change and circle another letter.

Aman, 2013-11-11 information This book aims to do this for practitioners professionals in health welfare and education and interested laypersons including parents This is no easy task since the levels of technical knowledge vary from that of the special education teacher seeking information about the drugs that many such pupils will be receiving to that of the modern young child and adolescent psychiatrist whose grasp of the difficult fields of pharmacokinetics how drugs are absorbed distributed and eliminated and neurotransmitter physiology via which most psychoactive drugs work is daunting to the editors who grew up in the bucolic clinical empirical era Inevitably there are sections of the book that will prove too technical for any except the medically qualified but considerable effort has been applied to make much of the text especially that discussing the clinical uses and side effects of the drugs comprehensible to anyone used to getting information by reading We also take comfort in the fact that many of the major contributions in pediatric psychopharmacology have been made by nonmedical professionals notably psychologists suggesting that an audience beyond the medically qualified is practicable One other problem confronted us whether to organize the book by psycho pathological symptoms e g hyperactivity and disorders e g autism or by drugs
