

INSTRUCTIONS FOR SETTING UP

(Adjusting and Operating Instructions are on page 3)

Remove all wires and arrange the parts conveniently.

Lubricate all bearings and moving parts as you proceed, and see that they work freely.

Bolts must be used in the holes in which they are found, or in the parts to which they are attached, unless otherwise shown.

Shaded portions in the illustrations show parts to be assembled; these must be placed on the machine in the order numbered.

Wherever the terms "left" and "right" are used, it should be understood to mean from a position behind and facing the machine.

We reserve the right to make changes or improvements in the design or construction of any part without incurring the obligation to install such changes on any machine previously delivered.

NOTE: The 1-F11 Two-Way Plow is designed for use on Farmall 100 Tractors having maximum tire size of 11-24" wide base tires on the rear wheels.

Illustr. 5

It will be most convenient to connect the plow frame to the Fast Hitch when setting up.

1. Bolt the shifting lever to the pivot bracket. See "O" in Illustr. 3 also.

2. Raise the plow slightly and bolt the bottoms to the frame. Remove the slack in these bolts by holding the point of the bottom down while tightening the bolts very tight.

3. Connect the rolling colters to the shanks. The set collar in the colter yoke will be tightened to the shank so the colter blade can swing freely to each side of a line leading directly forward.

See "ROLLING COLTER ADJUSTMENT" in the Instructions for Adjusting and Operating.
