

2. A student made up the following analogy for the resonance effect: "A kid lives on a block with very few fences separating the back yards. The larger the number of yards he and the other kids have access to, the happier they are."

a) Explain what each of the underlined elements of the analogy represent in terms of chemistry.

A second student thinks this analogy is incomplete. She adds: "To figure out the happiness of a kid you must consider both the number of yards he has access to and the quality of the grass in each yard."

b) What does the quality of the grass in each yard represent?

3. Use curved arrows to show the most likely acid base reaction between the following pairs of molecules. Draw the products of the reaction including any important resonance structures.

4. Construct an explanation for why sulfuric acid is such a strong acid. (Note that sulfur is in the third row of the periodic table and can have more than 8 electrons.)
