Consumer Confidence Report Fallon:

The 2006 Budget Great Britain: Parliament: House of Commons: Treasury Committee,2006-05-02 2006 Budget Fourth report of session 2005 06 Vol 2 Oral and written Evidence Budget 2011 Great Britain: Parliament: House of Commons: Treasury Committee,2011-04-09 The report looks at the way the Office for Budget Responsibility has functioned in this the first Budget since it was permanently established It raises concerns about the timetable for the economic forecast noting the timetable agreed for this forecast and Budget required all decisions which would impact on the economic forecast to be made at least a fortnight before Budget day It recommended that the timetable should be revisited to provide more flexibility enabling economic shocks and late political decisions to be accommodated The Committee looked at the economy public finances the plan for growth taxation and the Office for Budget Responsibility It continues to press for a full review of the OBR including its powers remit and relationship to Parliament Also calling for gradual reform of the tax regime and noting the Government s decision to increase the supplementary rate of corporation tax on the oil and gas industry by 12 percentage points in the Budget less than a year after promising to provide a stable tax regime in the sector might weaken the Government s credibility in seeking to establish a stable tax regime The Committee was pleased with the further reduction in corporation tax announced in the Budget as this was a positive measure aimed at boosting growth With regard to Enterprise Zones it may have some effect in reviving particular areas but it was noted that almost all the evidence received is unsure about the extent to which they will contribute to UK growth It is clear that there is still much to be done on the details of this policy **Law and Corporate Behaviour** Christopher Hodges,2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance Systems in which reporting is essential for safety only function with a no blame culture The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new theory of ethical regulation This title is included in Bloomsbury Professional s International Arbitration online service
