Boone, 2012-01-06 *Wisdom in The Crises of Cyber-Capitalism* Dr. Ahmet EFE, 2020-09-04 Now capitalism became more dependent on ICT knowledge and innovative skills with the advent of nanotechnology, bio-chemical researches, DNA engineering, artificial intelligence, quantum computing, IoT, big data, e-governance, industry 4.0, and interactive social media. Nearly all of former tacit knowledge became explicit and has been available for netizens of the cyber world. Even human privacy, government credentials, and business secrets have been revealed easily by WikiLeaks and omnipresent social media. However, more than goodness of this kind of improvements and economic development, evil sides of digital divide, trolls, fake accounts, propaganda, social engineering, and dirty information have been emerged like thorns to roses. I have aimed to add value to the area by putting a systematic integrative and disciplined approach to the reality of cyber capitalism, which is a new mode of production and socio-technological relations that covers innovative processes of both public and private domains. Science, politics, economics, and nuclear military have confessed their impotency and insufficiency against a miniscule virus called COVID-19 that halted all dynamics and potentialities of the ultra and sub systems of capitalism. Without rhetorical dogmas of historical materialism and deterministic philosophy against the capitalism, we have tried a unique methodology of Divine point of view to obtain wisdom in the complex systems and intertwining relations using infusion of different knowledge domains in relation with capitalist dynamics. *Contemporary Business* Louis E. Boone, David L.
