New Testament Theology and the Greek Language Stanley E. Porter, 2022-10-20 In this book Stanley E Porter offers a unique language based critique of New Testament theology by comparing it to the development of language study from the Enlightenment to the present Tracing the histories of two disciplines that are rarely considered together Porter shows how the study of New Testament theology has followed outmoded conceptual models from previous eras of intellectual discussion He reconceptualizes the study of New Testament theology via methods that are based upon the categories of modern linguistics and demonstrates how they have already been applied to New Testament Greek studies Porter also develops a workable linguistic model that can be applied to other areas of New Testament research Opening New Testament Greek linguistics to a wider audience his volume offers numerous examples of the productivity of this linguistic model especially in his chapter devoted to the case study of the Son of Man

Ontology and the Logistic Analysis of Language Guido K  ng, 2012-12-06 It is the aim of the present study to introduce the reader to the ways of thinking of those contemporary philosophers who apply the tools of symbolic logic to classical philosophical problems Unlike the continental reader for whom this work was originally written the English speaking reader will be more familiar with most of the philosophers discussed in this book and he will in general not be tempted to dismiss them indiscriminately as positivists and nominalists But the English version of this study may help to redress the balance in another respect In view of the present emphasis on ordinary language and the wide spread tendency to leave the mathematical logicians alone with their technicalities it seems not without merit to revive the interest in formal ontology and the construction of formal systems A closer look at the historical account which will be given here may convince the reader that there are several points in the historical development whose consequences have not yet been fully assessed I mention e g the shift from the traditional three level semantics of sense and denotation to the contemporary two level semantics of representation the relation of extensional structure and intensional content in the extensional systems of Wittgenstein and Carnap the confusing changes in labelling the different kinds of analytic and apriori true sentences etc Among the philosophically interesting tools of symbolic logic Lesniewski's calculus of names deserves special attention
