Chemical Castration Story:

Sexual Predators Amongst Us Ronald A. Rufo, 2011-12-07 It is imperative that educators parents and potential victims be aware of sexual predators the danger they pose in our society and the resources available to help prevent this growing epidemic Written from a police perspective *Sexual Predators Amongst Us* examines the problem of sexual predation how the Internet has contributed to its growth Contraceptive Risk William Green, 2017-05-02 The story of Depo Provera joins the national struggle over the drug s FDA approval to the state legal issues raised by its contraceptive and criminal justice uses Depo Provera is known as an injectable hormonal birth control method but few are familiar with its dark and complicated history Depo Provera was tested on women since the mid 1960s without their informed consent until it was FDA approved in 1992 but never FDA approved as chemical castration for male sex offenders *Contraceptive Risk* is William Green s landmark study of Depo Provera Based on a fascinating combination of archival materials and interviews the book is framed as three interconnected stories told by Judith Weisz who chaired the FDA s Public Board of Inquiry on Depo Provera a scientific court by Anne MacMurdo who brought a products liability suit against Upjohn the drug s manufacturer for the deleterious side effects she suffered from the drug s use and by Roger Gauntlett an Upjohn heir who when he was convicted of sexual assault refused to take a dose of his family s own medicine as a probation condition Together these three stories of Depo Provera s convoluted fifty year odyssey call for a paradigm shift in pharmaceutical drug development *Contraceptive Risk* is a thoroughly researched and engrossing approach to the scientific political and institutional forces involved in health law and policy as well as the multifaceted politics of measuring risk **Simple Stories & Recitations** Padraig Mc Ginn, 2002

Sarnoff, 2001-03-30 Government supported junk social science or sanctified snake oil as Sarnoff terms it exists in all policy arenas along the entire political spectrum as policy advocates seek to justify the continuation of ineffective programs and to block alternative solutions This form of junk science is particularly dangerous and wasteful in terms of tax dollars because professional confirmation media investigation and government support lend it an unwarranted imprimatur of validity Sarnoff argues that it confuses the public and convinces them to support programs as ends in themselves rather than determining whether or not such efforts actually achieve purported goals Ineffectiveness incompetence lack of technology ideology masquerading as policy and even outright fraud serve to perpetuate the general confusion This situation is exacerbated by the proliferation of media attention much of it unmonitored for accuracy or bias Sanctified snake oil Sarnoff contends spawns industries that drain public resources and attention from real serious cases and distort public perceptions of the magnitude of the issues involved This study sheds new light on this muddle and offers recommendations which will make it more difficult for junk science to represent itself as legitimate social policy **International Documentary** ,1999 *Social Issues in Science and Technology* David E.
