Scientifica ,2005 Bring your science lessons to life with Scientifica Providing just the right proportion of reading versus doing these engaging resources are differentiated to support and challenge pupils of varying abilities *The Library-Classroom Partnership* Rosann Jweid,Margaret Rizzo,1998-06-25 The purpose of The Library Classroom Partnership is to assist library teachers and classroom teachers to effectively use the library and its resources as an extension of the classroom As in the earlier edition the lessons included in this book stress the library media skills needed by individuals for lifelong learning Long after adults have forgotten a particular fact of history or the techniques of balancing an equation they continue to use library skills to answer their questions and to meet the demands of an ever changing society It has been well documented that the skills taught in a library are most effectively learned within the context of classroom work To this end the librarian and the teacher must form a working team to take each other's ideas and develop them into effective learning experiences for students The authors have incorporated the teaching of those library media skills with every discipline taught in the school Through these lessons students will realize that research and reference are a vital part of the learning process complementing and enriching every subject The eleven disciplines English mathematics social studies science art music home and careers technology physical education health and foreign language normally taught in the junior high and middle schools are addressed in this work To be included a lesson must be a learning experience in both the library skills and the subject areas Each unit has been cooperatively developed using the expertise of the school library media specialist and the subject teacher All lessons have been implemented successfully in the junior high and middle school environment This revised and expanded edition of The Library Classroom Partnership also deals with technology and the changing economic and social conditions affecting public schools It includes a new section on reading enrichment as well as instruction in accessing information electronically *Image Processing Using Pulse-Coupled Neural Networks* Thomas Lindblad,Jason M. Kinser,2005-11-28 This is the first book to explain and demonstrate the tremendous ability of Pulse Coupled Neural Networks PCNNs when applied to the field of image processing PCNNs and their derivatives are biologically inspired models that are powerful tools for extracting texture segments and edges from images As these attributes form the foundations of most image processing tasks the use of PCNNs facilitates traditional tasks such as recognition foveation and image fusion PCNN technology has also paved the way for new image processing techniques such as object isolation spiral image fusion image signatures and content based image searches This volume contains examples of several image processing applications as well as a review of hardware implementations Chemical Librarianship Arleen N Somerville,2013-10-18 As early as the 18th century chemists emphasis on up to date literature presented research librarians with many challenges But now Chemical Librarianship Challenges and Opportunities will show you how you can adapt your methods to the rapidly evolving demands of twentieth century chemical researchers without sacrificing your high standards of service Altogether this comprehensive

overview helps you see the major role librarians still play in information education and gives you a broad assortment of strategies for coping with the accelerated demands of today's shifting electronic research environment In Chemical Librarianship you'll read about the revolutionary pedagogical experiments of librarians teachers computer specialists and graduate students You'll see how those experiments have altered the way they approach research for the better and how you can make positive adjustments in your own successful formulae Individual chapters discuss librarians as teachers the pros and cons of integrating separating chemical information courses faculty and computing staff partnership at the University of Florida Yale University's experiment with The Electronic Seminar System the evolution of electronic journals the most recent trends in academic serial collection Take 100 mg of quickly changing research technology a drop of increased enrollment and 250 cc's of faculty requests shake it up in an Erlenmeyer flask heat it at 200 degrees Celsius and what do you get An explosion A disaster If these are your fears put them away Open up Chemical Librarianship and let some of the most informed experts on research and technology help you and your staff find just the right chemistry
