

AP Chemistry Midterm review packet

The test will be formatted like a mini AP Test

The exam starts at 7:00 so there 2 hours and 20 minutes to complete the exam.

The period will be broken into 2 70 minute segments with a 5 minute break. One for multiple choice **without** a calculator, and one for free response where you are allowed to use a calculator. You will not be able to work on the other section if you finish early or return to the previous section.

There will be 35 multiple choice questions, 4 free response questions. Each section is worth 50% of the exam grade. The actual AP test will be 3 hours long and consist of 60 multiple choice questions (90 minutes) and 3 long free response problems and 4 short free response questions (105 minutes).

In most cases, questions will come off of old AP tests.

You will be given the AP periodic table, and the double sided equations and constants sheet for the exam

The AP test centers around the following 9 "Units".

Unit 1 Atomic Structure and Properties

Unit 2 Molecular and Ionic Compound Structure and Properties

Unit 3 Intermolecular Forces and Properties

Unit 4 Chemical Reactions

Unit 5 Kinetics

Unit 6 Thermodynamics

Unit 7 Equilibrium

Unit 8 Acids and Bases

Unit 9 Application of Thermodynamics

We have not started Unit 9. We have lots of stuff to add to each unit. We did not go in order.
