Confronting Silence Toru Takemitsu, 1995 Takemitsu's desire to express thoughts in prose as well as music not typical of Japanese composers until recently is more frequently associated with nineteenth century European composers With little interest in program music

Takemitsu does not believe that words explain the essence of music Words are important in his own compositional technique however and his interest in writing is certainly more than casual Words stimulate his imagination and give rise literally to images that in turn activate his sensibilities in his search for sound the real essence of music

**Contemporary Music and Spirituality** Robert Sholl, Sander Van Maas, 2016-08-12 The flourishing of religious or spiritually inspired music in the late twentieth and early twenty first centuries remains largely unexplored The engagement and tensions between modernism and tradition and institutionalized religion and spirituality are inherent issues for many composers who have sought to invoke spirituality and Otherness through contemporary music Contemporary Music and Spirituality provides a detailed exploration of the recent and current state of contemporary spiritual music in its religious musical cultural and conceptual philosophical aspects At the heart of the book are issues that consider the role of secularization the claims of modernity concerning the status of art and subjective responses such as faith and experience The contributors provide a new critical lens through which it is possible to see the music and thought of Cage Ligeti Messiaen Stockhausen as spiritual music The book surrounds these composers with studies of and by other composers directly associated with the idea of spiritual music Harvey Gubaidulina MacMillan P r t Pott and Tavener and others Adams Birtwistle Ton de Leeuw Ferneyhough Ustvolskaya and Vivier who have created original engagements with the idea of spirituality Contemporary Music and Spirituality is essential reading for humanities scholars and students working in the areas of musicology music theory theology religious studies philosophy of culture and the history of twentieth century culture

[The Political Force of Musical Beauty](#) Barry Shank, 2014-03-17 In The Political Force of Musical Beauty Barry Shank shows how musical acts and performances

generate their own aesthetic and political force creating however fleetingly a shared sense of the world among otherwise diverse listeners Rather than focusing on the ways in which music enables the circulation of political messages he argues that communities grounded in the act and experience of listening can give rise to new political ideas and expression Analyzing a wide range of beautiful music within popular and avant garde genres including the Japanese traditions in the music of Takemitsu Toru and Yoko Ono the drone of the Velvet Underground and the insistence of hardcore punk and Riot grrrl post punk Shank finds that when it fulfills the promise of combining sonic and lyrical differences into a cohesive whole musical beauty has the power to reorganize the basis of social relations and produce communities that recognize meaningful difference

*Yogaku* Luciana Galliano, 2002-11-19 This book introduces us to the world of contemporary Japanese music and it guides us towards a better understanding of their world Luciano Berio *Yogaku* discusses over a century of musical activity in Japan detailing in particular the music that was inspired by Western music after the Meiji Restoration in the 19th century and its development through the end of the 20th century The book not only examines the infiltration of Western music into Japan but also provides insight into the aesthetic and theoretical aspects of Japanese musical thought The word *yogaku* Western music is made up of two characters *yo* which means ocean that is over the ocean meaning Western or foreign and *gaku* which means music Divided into two parts the text covers the period preceding World War I as well as the post war period The introduction provides a history of music's role in Japanese society touching upon the differences in the functions of Japanese and Western music Part One describes the complex process of a new musical world and the European musical ideas that penetrated Japan Modernization through westernization is explored the author details the differences between the traditional Japanese music and that composed under Western influence as well as the French and German impact on Japanese musical compositions Galliano looks at the appearance of music in schools and the first Japanese musical compositions as well as nationalism's effect on music through propaganda and censorship Part Two explores topics such as the post war avant garde the 1960s boom in traditional music and the closing decades of the 20th century The next generation of Japanese composers are also considered Japanese history and music scholars as well as those interested in Japanese music will want to include *Yogaku* in their collection

**Postnational Musical Identities** Ignacio Corona, Alejandro L. Madrid, 2007-12-28 *Postnational Musical Identities* gathers interdisciplinary essays that explore how music audiences and markets are imagined in a globalized scenario how music reflects and reflects upon new understandings of citizenship beyond the nation state and how music works as a site of resistance against globalization

Hybridity postnationalism transnationalism globalization diaspora and similar buzzwords have not only informed scholarly discourse and analysis of music but also shaped the way musical productions have been marketed worldwide in recent times. While the construction of identities occupies a central position in this context there are discrepancies between the conceptualization of music as an extremely fluid phenomenon and the traditionally monovalent notion of identity to which it has historically been incorporated. As such music has always been linked to the construction of regional and national identities. The essays in this collection seek to explore the role of music networks of music distribution music markets music consumption music production and music scholarship in the articulation of postnational sites of identification.
