

ANATOMY OF THE HUMAN SKELETON: THE AXIAL SKELETON

The axial skeleton is composed of the skull, the hyoid bone, the rib cage, and the vertebral column. The appendicular skeleton is composed of the arms and legs. The pelvic girdle and the pectoral girdle are the two main groups of bones that connect the axial skeleton to the appendicular skeleton. The axial skeleton is the central part of the skeleton, and it is the part that is most visible when you look at a human skeleton. The axial skeleton is made up of the skull, the hyoid bone, the rib cage, and the vertebral column. The axial skeleton is the part of the skeleton that is most important for the protection of the brain and the spinal cord. The axial skeleton is also the part of the skeleton that is most important for the support of the head and the neck. The axial skeleton is the part of the skeleton that is most important for the movement of the head and the neck. The axial skeleton is the part of the skeleton that is most important for the breathing process. The axial skeleton is the part of the skeleton that is most important for the circulation of blood. The axial skeleton is the part of the skeleton that is most important for the excretion of waste. The axial skeleton is the part of the skeleton that is most important for the regulation of body temperature. The axial skeleton is the part of the skeleton that is most important for the maintenance of the body's internal environment. The axial skeleton is the part of the skeleton that is most important for the overall health and well-being of the human body.

RAISE YOUR HAND Patti

Nemeth,2023-04-10 Eight year old Patti is caught reading in her bedroom by her mother who warns her not to be a bookworm because no one will marry her From such an early start she faces the enormity of her educational disadvantage with parents who are unschooled ignorant of the importance of education and therefore unable to offer nurturing or guidance She finds a different source of validation by competing with her classmates academically Despite good grades her parents forbid her from attending college and disown her Banished and without money she finds her way to college There she cautiously takes her path by emulating those she admires and rejecting negative influences Eventually she receives her PhD in Anatomy from UCLA Medical School Her scientific career takes her on an adventure of learning and discovery with fieldwork in Africa and to Europe where she immerses herself in bold new academic and cultural experiences On return to the USA she joins the faculty at Washington University School of Medicine Her career in science becomes permeated with disappointments from frequent encounters with misogyny Confident that her medical science background would serve her Patti changes her career to clinical medicine and receives an MD from Washington University She discovers life as a physician to be her true calling one that calls on expertise as both a healer and teacher As revealed through patients stories she gains empathy compassion and understanding of the importance of personal dignity During the learning process she meets her true love and finds everlasting richness in a balanced life of family and career *Animal Behavior Abstracts* ,1997
