together international contributions from the leading experts in industry and the latest research from academia to provide a
comprehensive update to all those working in design development and manufacturing of fuel injection systems Contents
include Emission reduction with advanced two actuator EUI for heavy duty diesel engines Investigation of a two valve
electronically controlled unit injector on a Euro IV heavy duty diesel engine using design of experiment methods
Characterization of in cylinder fuel distribution from an air assisted fuel injection system using advanced laser diagnostics
High contact stress applications of a silicon nitride in modern diesel engines The use of the HLMI hydraulic leak
