### CONSTRUCTION SAFETY

#### The Code of Federal Regulations (CFR)

This is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas. Based on this breakdown, the Occupational Safety and Health Administration is designated Title 29-Labor, and Chapter XVII is set aside for the Occupational Safety and Health Administration. Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis. OSHA's regulations (Title 29) are therefore issued as of July 1. The approximate revision date is printed on the cover of each volume.

The Code of Federal Regulations is kept up to date by the individual issues of the *Federal Register*. These two publications (the CFR and the *Federal Register*) must be used together to determine the latest version of any given rule. To determine whether there have been any amendments since the revision date of the Code volume in which the user is interested, the following two lists must be consulted: the "Cumulative List of CFR Sections Affected" which is issued monthly and the "Cumulative List of Parts Affected" which appears daily in the *Federal Register*. These two lists refer the reader to the *Federal Register* page where the latest amendment of any given rule can be found. The pages in the *Federal Register* are numbered sequentially from January 1 to January 1 of the next year.

The Title 29, Chapter XVII, the regulations are further broken down into Parts. For example, Part 1926, is titled *Construction Safety Standards*. Some Parts are considered general because they apply to any employer in any industry. Other General Parts that are applicable to Construction are *Part 1903 titled OSHA Inspections*, *Part 1904 titled OSHA Record Keeping*, specific portions of *Part 1910 titled General Industry* such as fire protection is pertinent to construction, and the General Duty clause under Section 5(a) (1) are additional regulations that the contractor must comply with according to the Occupational Safety and Health Administration.

#### OSHA Paragraph Numbering

The paragraph numbering for the *Code of Federal Regulations* and the *Federal Register* is shown below. We will use this citation number to describe each portion of the citation.

29 CFR 1926.950(c)(1)(iii)

From this example, the first number 29 is the Title 29 for Labor. The second abbreviation is CFR which is the abbreviation for Code of Federal Regulations. The third number is the Part number which is 1926 the Construction Safety Standards. Next you see a period. Following the period is an arabic number which is the Section Number. This Section Number is also related to a Subpart
