Lippincott's Monthly Magazine ,1912 **'Mixed Race' Studies** Jayne O. Ifekwunigwe,2015-03-24 Mixed race studies is one of the fastest growing as well as one of the most important and controversial areas in the field of race and ethnic relations Bringing together pioneering and controversial scholarship from both the social and the biological sciences as well as the humanities this reader charts the evolution of debates on race and mixed race from the nineteenth to the twenty first century The book is divided into three main sections tracing the origins miscegenation moral degeneracy and genetics mapping contemporary and foundational discourses mixed race identities politics and celebration debating definitions multiraciality census categories and critiques This collection adds a new dimension to the growing body of literature on the topic and provides a comprehensive history of the origins and directions of mixed race research as an intellectual movement For students of anthropology race and ethnicity it is an invaluable resource for examining the complexities and paradoxes of racial thinking across space time and disciplines *The Black-White Test Score Gap* Christopher Jencks,Meredith Phillips,2011-01-01 The test score gap between blacks and whites on vocabulary reading and math tests as well as on tests that claim to measure scholastic aptitude and intelligence is large enough to have far reaching social and economic consequences In their introduction to this book Christopher Jencks and Meredith Phillips argue that eliminating the disparity would dramatically reduce economic and educational inequality between blacks and whites Indeed they think that closing the gap would do more to promote racial equality than any other strategy now under serious discussion The book offers a comprehensive look at the factors that contribute to the test score gap and discusses options for substantially reducing it Although significant attempts have been made over the past three decades to shrink the test score gap including increased funding for predominantly black schools desegregation of southern schools and programs to alleviate poverty the median black American still scores below 75 percent of American whites on most standardized tests The book brings together recent evidence on some of the most controversial and puzzling aspects of the test score debate including the role of test bias heredity and family background It also looks at how and why the gap has changed over the past generation reviews the educational psychological and cultural explanations for the gap and analyzes its educational and economic consequences The authors demonstrate that traditional explanations account for only a small part of the black white test score gap They argue that this is partly because traditional explanations have put too much emphasis on racial disparities in economic resources both in homes and in schools and on demographic factors like family structure They say that successful theories will put

more emphasis on psychological and cultural factors such as the way black and white parents teach their children to deal with things they do not know or understand and the way black and white children respond to the same classroom experiences Finally they call for large scale experiments to determine the effects of schools racial mix class size ability grouping and other policies In addition to the editors the contributors include Claude Steele Ronald Ferguson William G Bowen Philip Cook and William Julius Wilson **The Booklist** ,1929 Nineteenth Century and After ,1907 *The Athenaeum* ,1901 **American pigeon journal** ,1929 **A New English Dictionary on Historical Principles: part 1.
