This unique annotated bibliography lists nearly 300 books on the art of blacksmithing. It is divided into four parts: Practical Blacksmithing, Specialized Areas of Blacksmithing, Historical Background of the Profession and Products of the Forge, and Part 1 deals with the technical side of blacksmithing, the texts, manuals, and courses aimed at teaching the basic processes. It includes reference books on the materials of blacksmithing and on metallurgy. Part 2 presents the more specialized and advanced processes of blacksmithing, including ornamental ironwork, farm smithing, industrial forging, and bladesmithing. It also includes materials related to pattern welded Damascus steel. The listings in part 3 deal with blacksmithing as a literary and historical subject. The primary focus of these books is on the traditions, lore, and descriptions of the trade. In these books, the processes, tools, and products are of only secondary importance.
