Department Human Report Right State Us:

A Review of the State Department's Human Rights Reports from the Victims' Perspective United States. Congress. House. Committee on International Relations. Subcommittee on International Operations and Human Rights, 2002

U.S. Human Rights Policy and Review of the State Department's Country Reports on Human Rights Practices for 1989 United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Human Rights and International Organizations, 1990

Making Human Rights a Reality Emilie M. Hafner-Burton, 2013-03-21 In the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights In many countries though there is little relationship between international law and the actual protection of human rights on the ground Making Human Rights a Reality takes a fresh look at why it s been so hard for international law to have much impact in parts of the world where human rights are most at risk Emilie Hafner Burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection These human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest Success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions To date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities Hafner Burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population

Trafficking and Human Rights Leslie Holmes, 2010-01-01 Human trafficking is widely considered to be the fastest growing branch of trafficking As this important book reveals it has moved rapidly up the agenda of states and international organisations since the early 1990s not only because of this growth but also as its implications for security and human rights have become clearer This fascinating study by international experts provides original research findings on human trafficking with particular reference to Europe South East Asia and Australia A major focus is on why and how many states and organisations act in ways that undermine trafficked victims rights as part of quadruple victimisation It compares and contrasts policies and suggests which seem to work best and why The contributors also advocate radical new approaches that most states and other formal organisations appear loath to introduce for reasons that are explored in this unique book

Amnesty, Human Rights and Political Transitions Louise Mallinder, 2008-09-10 Amnesty laws are political tools used since ancient times by states wishing to quell dissent introduce reforms or achieve peaceful relationships with their enemies In recent years they have become contentious due to a perception that they violate international law particularly the rights of victims and contribute to further violence This view is disputed by political negotiators who often argue that amnesty is a necessary price to pay in order to achieve a stable peaceful and equitable system of government This book aims to investigate whether an amnesty necessarily entails a

violation of a state's international obligations or whether an amnesty accompanied by alternative justice mechanisms can in fact contribute positively to both peace and justice This study began by constructing an extensive Amnesty Law Database that contains information on 506 amnesty processes in 130 countries introduced since the Second World War The database and chapter structure were designed to correspond with the key aspects of an amnesty why it was introduced who benefited from its protection which crimes it covered and whether it was conditional In assessing conditional amnesties related transitional justice processes such as selective prosecutions truth commissions community based justice mechanisms lustration and reparations programmes were considered Subsequently the jurisprudence relating to amnesty from national courts international tribunals and courts in third states was addressed The information gathered revealed considerable disparity in state practice relating to amnesties with some aiming to provide victims with a remedy and others seeking to create complete impunity for perpetrators To date few legal trends relating to amnesty laws are emerging although it appears that amnesties offering blanket unconditional immunity for state agents have declined Overall amnesties have increased in popularity since the 1990s and consequently rather than trying to dissuade states from using this tool of transitional justice this book argues that international actors should instead work to limit the more negative forms of amnesty by encouraging states to make them conditional and to introduce complementary programmes to repair the harm and prevent a repetition of the crimes David Dyzenhaus This is one of the best accounts in the truth and reconciliation literature I've read and certainly the best piece of work on amnesty I've seen Diane Orentlicher Ms Mallinder's ambitious project provides the kind of empirical treatment that those of us who have worked on the issue of amnesties in international law have long awaited I have no doubt that her book will be a much valued and widely cited resource *Raintree Health Care Center V.
