Der Halbierte Mann German Edition:

Thinking About Social Policy Franz-Xaver Kaufmann, 2012-11-15 The book traces the political history of the concept of social policy Social policy originated in Germany in the mid 19th century as a scholarly term that made a career in politics The term became more prominent only after World War II Kaufmann the doyen of the sociology of social policy in Germany argues that social policy responds to the modern disjunction between state and society diagnosed by the German philosopher Hegel Hegel's disciple Lorenz von Stein saw social policy as a means to pacify the capitalist class conflict After World War II social policy expanded in an unprecedented way changing its character in the process Social policy turned from class politics into a policy for the whole population with new concepts like social security redistribution and quality of life and new overarching formulas social market economy and social state the German version of welfare state Both formulas have remained indeterminate and contested indicating the inherent openness of the idea of the social [Beyond Communication.](#)

[A Critical Study of Axel Honneth's Social Philosophy](#) Jean-Philippe Dr. Deranty, 2009-06-24 Few thinkers have made such significant contribution to social and political thinking over the last three decades as Axel Honneth His theory of recognition has rejuvenated the political vocabulary and allowed Critical Theory to move beyond Habermas Beyond Communication is the first full scale study of Honneth's work covering the whole range of his writings from his first sociological articles to the latest publications By relocating the theory of recognition within the tradition of European social theory the book exposes the full depth and breadth of Honneth's philosophical intervention The book will be an indispensable resource for anyone interested in contemporary philosophy and the social sciences **The Question of Unworthy Life** Dagmar

Herzog, 2024-10-08 The dark history of eugenic thought in Germany from the nineteenth century to today and the courageous countervoices Between 1939 and 1945 Nazi genocide claimed the lives of nearly three hundred thousand people diagnosed with psychiatric illness or cognitive deficiencies Not until the 1980s would these murders as well as the coercive sterilizations of some four hundred thousand others classified as feeble minded be officially acknowledged as crimes at all The Question of Unworthy Life charts this history from its origins in prewar debates about the value of disabled lives to our continuing efforts to unlearn eugenic thinking today Drawing on a wealth of rare archival evidence Dagmar Herzog sheds light on how Germany became the only modern state to implement a plan to eradicate cognitive impairment from the entire body politic She traces how eugenics emerged from the flawed premise that intellectual deficiency was biologically hereditary and how this crude explanatory framework diverted attention from the actual economic and clinical causes of disability Herzog describes how the vilification of the disabled was dressed up as the latest science and reveals how Christian leaders and prominent educators were complicit in amplifying and legitimizing Nazi policies Exposing the driving forces behind the Third Reich's first genocide and its persistent legacy today The Question of Unworthy Life recovers the stories of the unsung advocates for disability rights who challenged the aggressive victimization of the disabled and developed

alternative approaches to cognitive impairment based on ideals of equality mutuality and human possibility Gender and Work in Transition Regina Becker-Schmidt, 2002-01-31 World wide economic political and cultural changes transform labor markets frames of divisions of work labor organization and family structures This can be demonstrated in a specific way in Western Middle and Eastern Europe where globalization and forced technology development from the one side cross with transformations processes in forms of government from the other side Our investigation within this context emphasizes the question how the living conditions of working women in comparison with those of men are touched by these social overturns The findings presented in this volume throw light on the ambiguities which political transformation and economic globalization effect on women's work Women profit by the emergence of working places that are brought forth by new market activities But at the same time many of them lose qualified occupations by shifting from full time to part time jobs from high paid sectors to low remunerated industries In all countries we find gender based income differences The proportion of women in political organizations is everywhere lower than that of men The growing time pressure in the employment system reinforces women's strain to combine household duties child raising and paid work Going beyond Europe we have to recognize the widening gap between industrialized regions and developing countries **National Union Catalog**, 1973 Includes entries for maps and atlases **German books in print**, 1994 **Anzeiger des Germanischen Nationalmuseums** Germanisches Nationalmuseum, 1899 **Mitteilungen aus der Königlichen Prüfungsanstalt für Wasserversorgung und Abwässerbeseitigung zu Berlin** Berlin (Germany).
