 Albert Kaskel, 1994-04-19      *Computer Algebra in Scientific Computing CASC'99* Victor G. Ganzha, Ernst W. Mayr, 1999-05-31  
 The development of powerful computer algebra systems has considerably extended the scope of problems of scientific computing which can now be solved successfully with the aid of computers. However, as the field of applications of computer algebra in scientific computing becomes broader and more complex, there is a danger of separation between theory systems and applications. For this reason, we felt the need to bring together the researchers who now apply the tools of computer algebra for the solution of problems in scientific computing in order to foster new and closer interactions. CASC 99 is the second conference devoted to applications of computer algebra in scientific computing. The first conference in this sequence, CASC 98, was held 20-24 April 1998 in St. Petersburg, Russia. This volume contains revised versions of the papers submitted by the participants and accepted by the program committee after a thorough reviewing process. The collection of papers included in the proceedings covers various topics of computer algebra: methods, algorithms, and software applied to scientific computing; symbolic, numeric analysis and solving differential equations; efficient computations with polynomials, groups, matrices, and other related objects; special purpose programming environments; application to physics, mechanics, optics, and to other areas. In particular, a significant group of papers deals with applications of computer algebra methods for the solution of current problems in group theory, which mostly arise in mathematical physics.      PERRY'S CHEMICAL ENGINEER'S HANDBOOK 8/E SECTION 23 PROCESS SAFETY (POD)
