

# DESIGN BRIEF

11. The job we have been tasked with, the problem of building the need for a shopping centre to be created. The shopping centre will be designed carefully and conveniently to fit a building, functioning and growing store. Our job is to create the concept designs in the necessary requirements and job will be further out and advance.

12. The main role is for us to find a final design that best fits the context and meet it into the site plan. The process will consist with firstly doing the rough research on several factors of the desired building such as: layout and placing of all points of small businesses and businesses, types and sizes of refrigerated display units and walk-in refrigerators, design and construction detail of cross-pitch roads and firstly store and details of shop frontage glass window and doors.

Considering the designing through drawings and critical analysis I will start with creating the technical drawings of possible design solutions and then going through a selection process where the best design is chosen. This drawing will then be designed and presented a natural different layout of drawings starting with a floorplan to the side of 1:100. Following with a 'Isometric Elevation of the North Western Elevation', 'Is Elevation showing the front and side view', 'Site Plan of the building on the given ground', 'Two Point Perspective showing the front view', having all of these drawings give a general view idea of the proposed building design.
