# Introduction

## 1.1 Scope of the document

*This section will cover details regarding scope of the document*

**Sample Content:**

This document outlines the high level functional design of tax payer registration functionality. It highlights/refers the high level flows / Use cases in registration process, design of components, along with the rationale for the same. It serves as an input to the low level design documents that would further elaborate on the application design.

## 1.2 Intended Audience

- *This section will cover categories of audiences who will be referring/reviewing this document*

**Sample Content:**

- *Web portal Development Team*
- *Architecture Team*
- *Quality Team*
- *Department*

## 1.3 System overview

- *This section will capture high level overview of system application i.e. for what system is being developed ,the high level process flow*
- *Who are the stake holders of system*

**Sample Content:**

This system provides a web interface to the tax payer for filling up registration form and submits his registration request. This system also provides facility to integrate third party application through API so that tax payer can use third party application for registration. In Registration process, tax payer need to complete registration form having some mandatory and optional fields. This system will do the both structural validation and data validation in real time. There will be separate work flow for approval.

# System Design

## Application Design

*This section will capture Process flow, Information flow having sequence diagram for different use cases, component design details, key design considerations taken and API catalogue*

### Process Flow

*This section will capture the flowcharts(s) representing process diagram*

**Sample Process Flow Chart:**

*If we take tax payer registration work flow as a sample, Work flow diagram will be as shown in diagram*
