'08 John S. Gero, Ashok K. Goel, 2008-09-27 The importance of research and education in design continues to grow For example government agencies are gradually increasing funding of design research and increasing numbers of engineering schools are revising their curricula to emphasize design This is because of an increasing realization that design is part of the wealth creation of a nation and needs to be better understood and taught The continuing globalization of industry and trade has required nations to re examine where their core contributions lie if not in production efficiency Design is a precursor to manufacturing for physical objects and is the precursor to implementation for virtual objects At the same time the need for sustainable development is requiring design of new products and processes and feeding a movement towards design novations and inventions There are now three sources for design research design computing design cognition and human centered information technology The foundations for much of design computing remains artificial intelligence with its focus on ways of representation and on processes that support simulation and generation Artificial intelligence continues to provide an environment rich paradigm within which design research based on computational constructions can be carried out Design cognition is founded on concepts from cognitive science an even newer area than artificial intelligence It provides tools and methods to study human designers in both laboratory and practice settings

S Gero, 2016-12-31 This book gathers the peer reviewed and revised versions of papers from the Seventh International Conference on Design Computing and Cognition DCC 16 held at Northwestern University Evanston Chicago USA from 27-29 June 2016 The material presented here reflects cutting edge design research with a focus on artificial intelligence cognitive science and computational theories The papers are grouped under the following nine headings describing advances in theory and applications alike and demonstrating the depth and breadth of design computing and design cognition Design Creativity Design Cognition Design Approaches Design Support Design Grammars Design Cognition Design Behaviors Design Processes Design Synthesis Design Activity and Design Knowledge The book will be of particular interest to researchers developers and users of advanced computation in design across all disciplines and to all readers who need to gain a better understanding of designing

Experimental Design Research Philip Cash, Tino Stanković, Mario Štorga, 2016-05-17 This book presents a new multidisciplinary perspective on and paradigm for integrative experimental design research It addresses various perspectives on methods analysis and overall research approach and how they can be synthesized to advance understanding of design It explores the foundations of experimental approaches and their utility in this domain and brings together analytical approaches to promote an integrated understanding The book also investigates

where these approaches lead to and how they link design research more fully with other disciplines e.g psychology cognition sociology computer science management Above all the book emphasizes the integrative nature of design research in terms of the methods theories and units of study from the individual to the organizational level Although this approach offers many advantages it has inherently led to a situation in current research practice where methods are diverging and integration between individual team and organizational understanding is becoming increasingly tenuous calling for a multidisciplinary and transdisciplinary perspective Experimental design research thus offers a powerful tool and platform for resolving these challenges Providing an invaluable resource for the design research community this book paves the way for the next generation of researchers in the field by bridging methods and methodology As such it will especially benefit postgraduate students and researchers in design research as well as engineering designers
