Design For A Vulnerable Planet Frederick Steiner:

Design for a Vulnerable Planet Frederick Steiner, 2011-04-01 We inhabit a vulnerable planet The devastation caused by natural disasters such as the southern Asian tsunami Hurricanes Katrina and Ike and the earthquakes in China's Sichuan province Haiti and Chile as well as the ongoing depletion and degradation of the world's natural resources caused by a burgeoning human population have made it clear that business as usual is no longer sustainable We need to find ways to improve how we live on this planet while minimizing our impact on it Design for a Vulnerable Planet sounds a call for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience Drawing on his own and others experiences across three continents Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection He begins by establishing the foundation for a more ecological approach to planning and design adopting a broad view of ecology as encompassing human and natural urban and wild environments Steiner explores precedents for human ecological design provided by architect Paul Cret landscape architect Ian McHarg and developer George Mitchell while discussing their planning for the University of Texas campus the Lake Austin watershed and The Woodlands Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State including regionalism urbanism and landscape in China and Italy He also examines the lessons to be learned from human and natural disasters such as 9/11 Hurricane Katrina and the BP oil spill Finally Steiner offers a blueprint for designing with nature to help heal the planet's vulnerabilities

City Project and Public Space Silvia Serreli, 2013-06-20 The book aims at nurturing theoretic reflection on the city and the territory and working out and applying methods and techniques for improving our physical and social landscapes The main issue is developed around the projectual dimension with the objective of visualising both the city and the territory from a particular viewpoint which singles out the territorial dimension as the city's space of communication and negotiation Issues that characterise the dynamics of city development will be faced such as the new fresh relations between urban societies and physical space the right to the city urban equity the project for the physical city as a means to reveal civitas signs of new social cohesiveness the sense of contemporary public space and the sustainability of urban development Authors have been invited to explore topics that feature a pluralism of disciplinary contributions studying formal and informal practices on the project for the city and seeking conceptual and operative categories capable of understanding and facing the problems inherent in the profound

transformations of contemporary urban landscapes **Reconsidering Ian McHarg** Ignacio Bunster-Ossa, 2017-11-08 In 1969 Ian McHarg laid out a new approach to land use planning His seminal work *Design by Nature* blazed the trail for sustainable urban development The road was paved with good intentions But where exactly did it lead And where do we go from here *Reconsidering Ian McHarg* offers a fresh assessment of McHarg's lessons and legacy It applauds his call for environmental stewardship while acknowledging its unintended results For McHarg's idyllic developments at the edge of nature turned greenfield sites into suburban communities They added to sprawl and made America more dependent on cars And they may even have delayed the kind of urban redevelopment needed to make today's cities more sustainable

Making Plans Frederick R. Steiner, 2018 **Remaking Metropolis** Edward Cook, Jesus J. Lara, 2013 It shows why particular approaches were successful or did not achieve their objectives **Ecosystem Management and Sustainability** Robin Kundis Craig, John Copeland Nagle, Bruce Parry, Oswald J. Schmitz, William K. Smith, Norman L. Christensen Jr, Janet Neuman, 2012-02-27 *Ecosystem Management and Sustainability* analyzes myriad human initiated processes and tools developed to foster sustainable natural resource use preservation and restoration It also examines how humans interact with plant marine and animal life in both natural and human altered environments Experts explain the complex ecosystem relationships that result from invasive species roads fencing and even our homes by addressing topics such as fire and groundwater management disturbance and ecosystem resilience Because most people in the 21st century live in urban environments the volume pays special attention to the ecology of cities with detailed coverage on topics ranging from urban agriculture to landscape architecture The volume focuses on how ecosystems across the world can be restored maintained and used productively and sustainably [Play Among Books](#) Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science
