

A black and white photograph with a vintage, slightly grainy aesthetic. In the center, a man is riding a bicycle towards the left. He is wearing a dark jacket and dark pants. To his left is a large, cylindrical lighthouse with a dark band around its top. In the background, to the right of the cyclist, three people are walking along a path. The sky is filled with large, dramatic clouds. The overall mood is nostalgic and cinematic.

This revised edition of John Hedgecoe's bestselling book on black and white photography tackles the most common problems associated with the medium. The first chapter, Basic Principles, explains how to convert from colour into black and white as well as the issues inherent in tonal range, texture, contrast, framing, movement, and filters. Discover how to implement these techniques into your work using still life portrait and landscape photography. Digital photography is now so commonplace that many photographers use nothing else. This edition includes a fully updated section assessing the role of the digital darkroom, including darkroom setup and how to make the most of computer manipulation, converting images, spotting, retouching, and cloning.
