Mathematical Literacy on Statistical Measures Christian Büscher,2018-07-14 In most countries only very limited time resources are available for statistics education within mathematics education Thus statistics education research needs to develop teaching learning arrangements that are compact and applicable to classrooms Christian Büscher designs and investigates a compact teaching learning arrangement which aims at mathematical and reflective knowledge about statistics Central results include the specification of the learning content of statistical measures an empirical reconstruction of students learning processes towards statistical measures and the identification of students situated reflections about mathematics within their learning processes *Political Pressures on Educational and Social Research* Karen Trimmer,2016-05-12 *Political Pressures on Educational and Social Research* draws upon a variety of theoretical and methodological approaches to consider the problems that can arise when research findings diverge from political directions for policy Chapters explore the impacts this can have on the researchers as well as the influence it has on the research including the methodology and the publication of results The book offers innovative ways of seeing how these connect overlap and interact revealing particular issues of concern for researchers and evaluators in the context of research internationally Key topics include the power and positioning of research evidence based policy development ethics and the importance of research that seeks to explore and discover knowledge The book is divided into two sections The first presents chapters from international academics which provide a theoretical underpinning and discussion of power policy ethics and their influence on research resourcing autonomy purpose and methodology The second section explores specific case studies and instances from the authors own experiences in the field This book offers an interesting and enlightening insight into the sometimes political nature of research and will appeal to researchers evaluators and postgraduate students in the fields of education and the social sciences It will be of particular interest to those studying research methods *The Report: Papua New Guinea 2015* Oxford Business Group,2016-09-17 In Papua New Guinea hopes are high that real change is on its way the country's political administrative financial and technical leaders now have to find a way to ensure the most productive distribution and use of financial resources Many international actors are watching closely to see how this young country negotiates its path Papua New Guinea became a major exporter of gas in 2014 when the 19bn PNG liquefied natural gas LNG project was completed ahead of schedule and within budget significantly increasing the size and strength of the economy The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector fuelling the growth of its economy as a whole The LNG influx also poses challenges however in terms of ensuring inclusive growth and productive use of the new revenues PNG takes pride in being a final frontier of natural and cultural development but the task ahead is to protect the country's heritage while becoming part of the global economy *Using Peer Tutoring to Improve Reading Skills* Keith Topping,David Duran,Hilde Van Keer,2015-10-08 *Using Peer Tutoring to Improve Reading Skills* is a very practical

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Understanding Developmental Dyslexia: Linking Perceptual and Cognitive Deficits to Reading Processes Pierluigi Zoccolotti, Peter F. de Jong, Donatella Spinelli, 2016-06-24 Understanding the mechanisms responsible for developmental dyslexia (DD) is a key challenge for researchers. A large literature mostly concerned with learning to read in opaque orthographies emphasizes phonological interpretations of the disturbance. Other approaches focused on the visual perceptual aspects of orthographic coding. Recently this perspective was supported by imaging data showing that individuals with DD have hypo activation in occipito temporal areas, a finding common to both transparent and opaque orthographies. Nevertheless it is difficult to infer causal relationships from activation data. Accommodating these findings within the cognitive architecture of reading processes is still an open issue. This is a general problem which is present in much of the literature. For example several studies investigating the perceptual and cognitive abilities that distinguish groups of children with and without DD failed to provide explicit links with the reading process. Thus several areas of investigation e.g. acoustic deficits or magnocellular deficiencies have been plagued by replication failures. Furthermore much research has neglected the possible contribution of comorbid symptoms. By contrast it is now well established that developmental disorders present a large spectrum of homotopic and heterotopic comorbidities that make causal interpretations problematic. This has led to the idea that the etiology of learning difficulties is multifactorial thus challenging the traditional models of DD. Recent genetic studies provide information on the multiple risk factors that contribute to the genesis of the disturbance. Another critical issue in DD is that much of the research has been conducted in English speaking individuals. However English is a highly irregular orthography and doubts have been raised on the appropriateness of automatically extending interpretations based on English to other more regular orthographies. By contrast important information can be gotten from systematic comparisons across languages. Thus the distinction between regular and irregular orthographies is another potentially fruitful area of investigation. Overall in spite of much research current interpretations seem unable to integrate all available findings. Some proposals focus on the cognitive description of the reading profile and explicitly ignore the distal causes of the disturbance. Others propose visual acoustic or phonological mechanisms but fail to link them to the pattern of reading impairment present in different children. The present Research Topic brings together studies based on different methodological approaches i.e. behavioural studies examining cognitive and psycholinguistic factors, eye movement investigations, biological markers, neuroimaging and genetic studies involving dyslexic groups with and without comorbid symptoms and in different orthographies, transparent and opaque, to identify the mechanisms underlying DD. The RT does not focus on a single model or theory of dyslexia but rather brings together different approaches and ideas which we feel are fruitful for a deeper understanding of developmental dyslexia.
