students academic writing under such umbrella terms like style reader awareness authorial voice writers identity stance evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction 5 Student writers textual production peer feedback and interactions with discourse communities 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education
