Optimization of adaptive test design methods for the determination of steady-state data-driven models in terms of combustion engine calibration Sandmeier, Nino, 2022-12-01 This thesis deals with the development of a model based adaptive test design strategy with a focus on steady state combustion engine calibration. The first research topic investigates the question how to handle limits in the input domain during an adaptive test design procedure The second area of scope aims at identifying the test design method providing the best model quality improvement in terms of overall model prediction error To consider restricted areas in the input domain a convex hull based solution involving a convex cone algorithm is developed the outcome of which serves as a boundary model for a test point search A solution is derived to enable the application of the boundary model to high dimensional problems without calculating the exact convex hull and cones Furthermore different data driven engine modeling methods are compared resulting in the Gaussian process model as the most suitable one for a model based calibration To determine an appropriate test design method for a Gaussian process model application two new strategies are developed and compared to state of the art methods A simulation based study shows the most benefit applying a modified mutual information test design followed by a newly developed relevance based test design with less computational effort The boundary model and the relevance based test design are integrated into a multicriterial test design strategy that is tailored to match the requirements of combustion engine test bench measurements A simulation based study with seven and nine input parameters and four outputs each offered an average model quality improvement of 36 % and an average measured input area volume increase of 65 % compared to a non adaptive space filling test design The multicriterial test design was applied to a test bench measurement with seven inputs for verification

Compared to a space filling test design measurement the improvement could be confirmed with an average model quality increase of 17 % over eight outputs and a 34 % larger measured input area Diese Arbeit befasst sich mit der Entwicklung einer modellbasierten adaptiven Versuchsplanungsstrategie fr die Anwendung in der Applikation des Station rverhaltens von Verbrennungsmotoren Der erste Forschungsteil untersucht wie sich Grenzen im Eingangsraum in die Versuchsplanung eines adaptiven Prozesses einbinden lassen Ein weiterer Fokus liegt auf der Identifikation einer modellbasierten Versuchsplanung die eine bestm gliche Verbesserung der globalen Modellqualit t hinsichtlich des Pr diktionsfehlers erm glicht Es wird ein Grenzraummodell auf Basis der konvexen H lle unter Zuhilfenahme eines Algorithmus zur Bestimmung eines konvexen Konus entwickelt das als Grundlage freine Versuchsplanung in beschrnkten Eingangsrumen verwendet wird Um die Anwendbarkeit bei hochdimensionalen Problemstellungen zu gew hrleisten wird ein Verfahren vorgestellt das eine Berechnung auch ohne die Bestimmung der exakten konvexen H lle und konvexen Konen erm glicht Des Weiteren werden verschiedene Methoden zur datengetriebenen Modellbildung des Verbrennungsmotors verglichen wobei das Gau Prozess Modell als die geeignetste Modellierungsmethode hervorgeht Um die bestm gliche Versuchsplanungsmethode bei der Anwendung des Gau Prozess Modells zu ermitteln werden zwei neue Strategien entwickelt und mit verf gbaren Methoden aus der Literatur verglichen Eine simulationsbasierte Studie zeigt dass eine angepasste Mutual Information Methode die besten Ergebnisse liefert Ein neu entwickeltes relevanzbasiertes Verfahren erreicht die zweitbesten Ergebnisse bietet aber einen geringeren Berechnungsaufwand als das Mutual Information Verfahren Das Grenzmodell und das relevanzbasierte Verfahren werden in einem multikriteriellen Versuchsplanungsverfahren zusammengef hrt das an die Anforderungen von Messungen an einem Verbrennungsmotorenpr fstand angepasst ist In einer simulationsbasierten Studie mit sieben bzw neun Eingangsparametern und jeweils vier Ausg ngen konnte eine durchschnittliche Modellqualit tsverbesserung von 36 % und eine mittlere Vergr erung des vermessenen Eingangsraumvolumens von 65 % im Vergleich zu einer nichtadaptiven raumf llenden Versuchsplanung gezeigt werden Das multikriterielle Versuchsplanungsverfahren wurde anhand von Pr fstandsmessungen mit sieben Eingangsparametern verifiziert Im Vergleich zu einer raumf llenden Versuchsplanung konnte eine mittlere Modellqualit tsverbesserung ber alle acht Ausg nge von 17 % und ein um 34 % vergr ertes vermessenes Eingangsraumvolumen erreicht werden wodurch die Ergebnisse der Simulationen best tigt werden konnten Analysis of Experiments, Student Solutions Manual Douglas C. Montgomery, 2002-08-27 Learn How to Achieve Optimal Industrial Experimentation Through four editions Douglas Montgomery has provided statisticians engineers scientists and managers with the most effective approach for learning how to design conduct and analyze experiments that optimize performance in products and processes Now in this fully revised and enhanced Fifth Edition Montgomery has improved his best selling text by focusing even more sharply on factorial and fractional factorial design and presenting new analysis techniques including the generalized linear model There is also expanded coverage of experiments with random factors

The book also illustrates two of today's most powerful software tools for experimental design Design Expert r and Minitab r Throughout the text You ll find output from these two programs along with detailed discussion on how computers are currently used in the analysis and design of experiments You ll also learn how to use statistically designed experiments to Obtain information for characterization and optimization of systems Improve manufacturing processes Design and develop new processes and products Evaluate material alternatives in product design Improve the field performance reliability and manufacturing aspects of products Learn how to conduct experiments effectively and efficiently Other important textbook features Student version of Design Expert r software is available Web site www wiley com college montgomery offers supplemental text material for each chapter a sample syllabus and sample student projects from the author's Design of Experiments course at Arizona State University Subject Guide to Books in Print, 2001 A Manual for Writers of Research Papers, Theses, and Dissertations, Ninth Edition Kate L. Turabian, 2018-04-27 When Kate L. Turabian first put her famous guidelines to paper she could hardly have imagined the world in which today s students would be conducting research Yet while the ways in which we research and compose papers may have changed the fundamentals remain the same writers need to have a strong research question construct an evidence based argument cite their sources and structure their work in a logical way A Manual for Writers of Research Papers Theses and Dissertations also known as Turabian remains one of the most popular books for writers because of its timeless focus on achieving these goals This new edition filters decades of expertise into modern standards While previous editions incorporated digital forms of research and writing this edition goes even further to build information literacy recognizing that most students will be doing their work largely or entirely online and on screens Chapters include updated advice on finding evaluating and citing a wide range of digital sources and also recognize the evolving use of software for citation management graphics and paper format and submission The ninth edition is fully aligned with the recently released Chicago Manual of Style 17th edition as well as with the latest edition of The Craft of Research Teachers and users of the previous editions will recognize the familiar three part structure Part 1 covers every step of the research and writing process including drafting and revising Part 2 offers a comprehensive guide to Chicago s two methods of source citation notes bibliography and author date Part 3 gets into matters of editorial style and the correct way to present quotations and visual material A Manual for Writers also covers an issue familiar to writers of all levels how to conquer the fear of tackling a major writing project Through eight decades and millions of copies A Manual for Writers has helped generations shape their ideas into compelling research papers This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines Bestselling trusted and time tested advice for writing research papers The best interpretation of Chicago style for higher education students and researchers Definitive clear and easy to read with plenty of examples Shows how to compose a strong research question construct an evidence based
