Ehrhart, 2015-11-06 Operations in Afghanistan frequently require United States ground forces to engage and destroy the enemy at ranges beyond 300 meters These operations occur in rugged terrain and in situations where traditional supporting fires are limited due to range or risk of collateral damage With these limitations the infantry in Afghanistan require a precise lethal fire capability that exists only in a properly trained and equipped infantryman While the infantryman is ideally suited for combat in Afghanistan his current weapons doctrine and marksmanship training do not provide a precise lethal fire capability to 500 meters and are therefore inappropriate Comments from returning non commissioned officers and officers reveal that about fifty percent of engagements occur past 300 meters The enemy tactics are to engage United States forces from high ground with medium and heavy weapons often including mortars knowing that we are restricted by our equipment limitations and the inability of our overburdened soldiers to maneuver at elevations exceeding 6000 feet Current equipment training and doctrine are optimized for engagements under 300 meters and on level terrain There are several ways to extend the lethality of the infantry A more effective 5.56 mm bullet can be designed which provides enhanced terminal performance out to 500 meters A better option to increase incapacitation is to adopt a larger caliber cartridge which will function using components of the M16 M4 The 2006 study by the Joint Service Wound Ballistics Integrated Product Team discovered that the ideal caliber seems to be between 6.5 and 7 mm This was also the general conclusion of all military ballistics studies since the end of World War I **Rifle Marksmanship** U.S. Department of the Army, 2018-01-16 Rifle Marksmanship is the newly revised official guide to planning and executing training on the M16 series rifles M16A1 M16A2 M16A3 and M16A4 and M4 carbine This handbook is developed by the US Army for commanders leaders and instructors to help create training programs and materials for soldiers to complete the United States Army rifle marksmanship program It offers a comprehensive guide to the specifics and capabilities of each weapon and an introduction to the fundamentals of marksmanship followed by complete guidance through each of the five stages of rifle marksmanship training Topics covered include Weapon Characteristics
